Leong,Mark M. Leach,2010-04-15 Suicide is increasingly understood and predicted as an intersection of biological psychological cognitive and sociocultural factors We have some basic knowledge of these factors and how they interact but presently we know very little about how culture can play a role as a variable that influences suicide Suicide Among Racial and Ethnic Minority Groups will go a long way towards filling that gap by pulling together cutting edge empirical research from general cultural diversity literature and applying it to suicide assessment treatment and prevention theory and practice By looking outside of the limited cross cultural studies done within suicidal populations the contributors all established experts in both multicultural counseling and suicidology expand the available empirical literature base in order to provide a deeper look into how culture can act as an important catalyst in suicidal intentions Following theoretical overviews the text focuses on six broad ethnic groups classified in the literature African American American Indian Asian American European American Hawaiian Pacific Islander and Hispanic with a main chapter devoted to each relating each culture to suicide research highlighting specific variables within the culture that can influence suicide and presenting appropriate treatment considerations A final section of the book consists of practical applications within specific settings therapy outreach schools psychiatric services and prevention and training issues *Equivocal Death* Arthur S. Chancellor,2025-03-13 Equivocal

Death Investigating Suicide Accidental and other Questionable Deaths refocuses the attention of first responders and investigative personnel to the concept of treating every death as a homicide until sufficient evidence is discovered to validate another manner of death and eliminate the possibility of a staged homicide All death investigations should include a well documented and examined crime scene and a thorough preliminary investigation It is a well established unwritten rule when conducting death investigations to initially treat every death as a possible homicide This includes the examination of the body the recovery scene the autopsy collection of forensic evidence and subsequent laboratory analysis Police and investigators are often confronted with a death scene that they cannot initially determine the manner of death these instances are known as equivocal death Coverage focuses on the basics of death investigation and the how to s rather than dwelling on extraneous and unnecessary detail By example it is generally more important for the detective or CSI to understand how to properly pick up forensic evidence at the scene and how the resulting analysis relates to their investigation rather than the mechanics of how the evidence is extracted and analyzed at the lab For suicide and equivocal deaths it is likewise important that detectives also understand the importance of such things as a victimology assessment risk factors and or ante mortem behaviors of the victim cues that may provide clues that would be consistent with someone contemplating suicide The book also features several aspects of criminal investigation that are not found in similar books including coverage of victimology including crime scene staging the notion of psychology autopsy and how to identify those risk factors or behaviors that are consistent with suicide including motive intent and ability Equivocal Death Investigating Suicide Accidental and other Questionable Deaths serves as an essential reference for the detective crime scene investigators coroners and medical examiners medicolegal investigators and prosecutors actively involved in these types of cases *Salem Health* Nancy A. Suicide and Homicide-Suicide Among Police Antoon Leenaars,Dale Lund,2017-07-28 The goal of this book is to fully explore what the author refers to as the near epidemic levels of suicide and homicide suicide among law enforcement officers and ultimately to offer recommendations and best practices with which to better address the problem The book begins by discussing suicide in some depth for one has to know suicide unequivocally to understand a suicidal or homicidal suicidal officer Suicide and homicide suicide are complex multi determined events the result of an interplay of individual relational social cultural and environmental factors The complexity of causation necessitates a parallel complexity of knowledge There are at least two avenues to understanding the nomothetic general approach which deals with generalizations using empirical statistical and demographic methods or techniques and the idiographic specific approach which typically involves the intense study of individuals This book explores both Attempting to be mindful of the needs of the office on the street the mental health provider the administrator the forensic specialist and the survivors of these needless tragedies the belief is that by

amalgamating the concerns of a diverse audience we can meet the challenge of identifying at risk individuals and situations and saving lives
