experiences of five countries with a history of ethnic conflict former Yugoslavia Bosnia Herzegovina Guyana Trinidad and Tobago and the United States It finds that in many cases solutions adopted to mitigate ethnic conflict have unintended consequences Often supposed solutions confuse cause and effect and in fact worsen ethnic conflict Attempts to address identity issues by pandering to them often led to further ethnic demands This book argues that based on the experiences of the countries under examination the best course is to adopt policies that encourage alliances between and among ethnic groups

**To Defend the Constitution** Ronald B. Flowers, 2003 People have been denied citizenship in America for many reasons Would it surprise you to learn that four of those people were denied because they were conscientious objectors to war The government believed that because they were not willing to bear arms in defense of the country they were not attached to the principles of the Constitution as required by naturalization law Ironically none of these people were eligible for military service because of their age and two of them were women Furthermore when both women were denied citizenship it was during a period when women could not serve in the military Following overviews of the history of immigration and pacifism in America chapters are devoted to the four different forms of conscientious objection philosophical absolute pacifism religiously informed absolute pacifism selective conscientious objection and conscientious cooperator Each chapter discusses the individual the arguments for their claim to citizenship the government's arguments against them and an analysis of the Supreme Court Opinion in their case In short each chapter gives a comprehensive treatment of the personalities and the issues involved A fascinating and informative read for theology and law students scholars and for those intrigued in immigration and or pacifism

**Americanizing the West** Frank Van Nuys, 2002 The arrival of immigrants on America's shores has always posed a singular problem once they are here how are these diverse peoples to be transformed into Americans The Americanization movement of the 1910s and 1920s addressed this challenge by seeking to train immigrants for citizenship representing a key element of the Progressives search for order in a modernizing America Frank Van Nuys examines for the first time how this movement in an effort to help integrate an unruly West into the emerging national system was forced to reconcile the myth of rugged individualism with the demands of a planned society In an era convulsed by world war and socialist revolution the Americanization movement was especially concerned about the susceptibility of immigrants to un American propaganda and union agitation As Van Nuys convincingly demonstrates this applied as much to immigrants in the urbanizing and industrializing West as it did to those occupying the ethnic enclaves of cities in the East In Americanizing the West he tells how hundreds of bureaucrats educators employers and reformers participated in this movement by developing adult immigrant education programs and how these attempts contributed more toward bureaucratizing the West than it did to turning immigrants into productive citizens He deftly ties this history to broader national developments and shows how Westerners brought distinctive approaches to Americanization to accommodate and preserve their own sense of history and identity Van Nuys shows that although racism and social control agendas permeated Americanization efforts in the West Americanizers sustained their faith in education as a powerful force in transforming immigrants into productive citizens He also shows how some westerners especially in California believed they faced a racial frontier unlike other parts of the country in light of the influx of Hispanics and Asians so that westerners

became major players in the crafting of not only American identity but also immigration policies The mystique of the white pioneer past still maintains a powerful hold on ideas of American identity and we still deal with many of these issues through laws and propositions targeting immigrants and alien workers Americanizing the West makes a clear case for regional distinctiveness in this citizenship program and puts current headlines in perspective by showing how it helped make the West what it is today
