Avengers Age Of Ultron Plugged In:

Marvel's Avengers: An Insider's Guide to the Avenger Films Jonathan Wilkins, 2019-12-24 Celebrate the Avengers collection in this official collector's guide to all four Avengers films from Marvel's *The Avengers* to *Avengers: Endgame*. Includes interviews with Robert Downey Jr. Iron Man, Chris Evans Captain America, Mark Ruffalo Hulk, Chris Hemsworth Thor, Scarlett Johansson Black Widow, Jeremy Renner Hawkeye and many more. Also features stunning images from the movies, exclusive behind-the-scenes photos and concept art.

Meta Television Erin Giannini, 2024-03-18 The idea of metatextuality is frequently framed as a recent television development and often paired with the idea that it represents genre exhaustion. US television, however, with its early live performances and set-bound sitcoms, always suggested an element of self-awareness that easily shaded into metatextuality even in its earliest days. *Meta Television* thus traces the general history of US television's metatextuality throughout television's history, arguing that TV's self-awareness is nothing new and certainly not evidence of a period of aesthetic exhaustion but instead is woven into both its past and present practice, elucidated through case studies featuring series from the 1970s to the present day, many of which have not been critically analyzed before, and the various ways they deploy metatext to both construct and deconstruct their narratives. Further, *Meta Television* asserts that this re- and deconstruction of narrative and production isn't just a reward to the savvy and/or knowledgeable viewer or consumer but seeks to make broader points about the media we consume and how we consume it. This book explores the ways in which the current metatextual turn in both the usual genres in which it appears (horror and sci-fi/fantasy) and its movement into drama and sitcom represents the next turn in television's inherent self-awareness. It traces this element throughout television's history, growing from the more modest reflexivity of programs' awareness of themselves as created objects in a particular medium to the more significant breaking of the fictive illusion and therefore the perceived distance between the audience and the series. Erin Giannini shows how the increased currency of metatextual television in the contemporary era can be tied to a viewership well-versed in its stories and production as well as able and willing to talk back via social media. If television reflects culture to a certain extent, this increased reflexivity mirrors that responsive audience as a consequence of the lack of distance that metafiction embraces. As Robert Stam traced the use and implications of reflexivity in film and literature, this book does the same for television, further problematizing John Ellis's glance theory in terms of both production and spectatorship.

Birth of the Binge Dennis Broe, 2019-03-04 A deep dive into the practice and execution of contemporary television viewing. *Birth of the Binge: Serial TV and the End of Leisure* describes and details serial television and binge watching, the exceedingly popular form of contemporary television viewing that has come to dominance over the past decade. Author Dennis Broe looks at this practice of media consumption by suggesting that the history of seriality itself is a continual battleground between a more unified version of truth-telling and a more fractured form of diversion and addiction. Serial television is examined for the ways its elements—multiple characters, defined social location, and season and series arcs—are

used alternately to illustrate a totality or to fragment social meaning Broe follows his theoretical points with detailed illustrations and readings of several TV series in a variety of genres including the systemization of work in *Big Bang Theory* and *Silicon Valley* the social imbrications of *Justified* and the contesting of masculinity in Joss Whedon's *Buffy the Vampire Slayer* *Firefly* and *Dollhouse* In this monograph Broe uses the work of Bernard Stiegler to relate the growth of digital media to a new phase of capitalism called hyperindustrialism analyzing the show *Lost* as suggestive of the potential as well as the poverty and limitations of digital life The author questions whether in terms of mode of delivery commercial studio structure and narrative patterns viewers are experiencing an entirely new moment or a hyper extension of the earlier network era *The Office* *The Larry Sanders Show* and *Orange Is the New Black* are examined as examples of respectively network cable and online series with structure that is more consistent than disruptive Finally Broe examines three series by J J Abrams *Revolution* *Believe* and *11.22.63* which employ the techniques and devices of serial television to criticize a rightward neo conservative drift in the American empire noting that none of the series were able to endure in an increasingly conservative climate The book also functions as a reference work featuring an appendix of 100 Seminal Serial Series and a supplementary index that television fans and media students and scholars will utilize in and out of the classroom

[AI for Death and Dying](#) Maggi Savin-Baden, 2021-08-27 What is artificial intelligence AI How does AI affect death matters and the digital beyond How are death and dying handled in our digital age AI for Dying and Death covers a broad range of literature research and challenges around this topic It explores ethical memorisation digital legacies and bereavement post death avatars and AI and the digital beyond It also analyzes religious perspectives on AI for death and dying and planning for death in a digital age Maggi Savin Baden is a Professor of Education at the University of Worcester and has researched and evaluated staff and student experiences of learning for over 20 years and gained funding in this area Leverhulme Trust JISC Higher Education Academy MoD She has a strong publication record of over 50 research publications and 17 books which reflect her research interests on the impact of innovative learning digital fluency cyber influence pedagogical agents qualitative research methods and problem based learning In her spare time she runs bakes climbs and attempts triathalons

The Science of Marvel Sebastian Alvarado, 2019-04-09 Science meets fantasy in this behind the scenes look at the Marvel Cinematic Universe now you can experience the magic of the movies and learn how to replicate it in real life The Marvel Cinematic Universe is filled with extraordinary humans and abilities There are teenaged geniuses swinging through the streets of New York billionaires creating impenetrable armor in hidden caves and aliens flying through wormholes to Earth All of these characters seem to lie firmly in the realm of fantasy but the technology behind them might not be as farfetched as you think *The Science of Marvel* pulls back the curtain and reveals the secrets behind Marvel movie magic and shows us how to recreate these comic book wonders in our everyday life Using quantum physics a little bit of mechanical engineering and some out of the box thinking you'll be amazed to discover that it's possible to create a real life Captain America Incredible
