Cross-Disciplinary Advances in Applied Natural Language Processing: Issues and Approaches

Boonthum-Denecke, Chutima, McCarthy, Philip M., Lamkin, Travis, 2011-12-31 This book defines the role of advanced natural language processing within natural language processing and alongside other disciplines such as linguistics computer science and cognitive science Provided by publisher [Automated Evaluation of Text and Discourse with Coh-Metrix](#) Danielle S.

McNamara, Arthur C. Graesser, Philip M. McCarthy, Zhiqiang Cai, 2014-03-24 Coh Metrix is among the broadest and most sophisticated automated textual assessment tools available today Automated Evaluation of Text and Discourse with Coh Metrix describes this computational tool as well as the wide range of language and discourse measures it provides Part I of the book focuses on the theoretical perspectives that led to the development of Coh Metrix its measures and empirical work that has been conducted using this approach Part II shifts to the practical arena describing how to use Coh Metrix and how to analyze interpret and describe results Coh Metrix opens the door to a new paradigm of research that coordinates studies of language corpus analysis computational linguistics education and cognitive science This tool empowers anyone with an interest in text to pursue a wide array of previously unanswerable research questions **Defining and Assessing Lexical**

Proficiency Agnieszka Leńko-Szymańska, 2019-11-05 This comprehensive account of performance based assessment of L2 lexical proficiency analyzes and compares two of the primary methods of evaluation used in the field and unpacks the ways in which they tap into different dimensions of one model of lexical competence and proficiency This book builds on the latest research on performance based assessment which has most recently pointed to the application of more quantitative measures to L2 data to systematically explore the qualitative method of using human raters in assessment exercises and the quantitative method of using automatic computation of statistical measures of lexis and phraseology Supported by an up to date review of the existing literature both approaches unique features are highlighted but also compared to one another to provide a holistic overview of performance based assessment as it stands today at both the theoretical and empirical level These findings are exemplified in a concluding chapter which summarizes results from an empirical study looking at a range of lexical and phraseological features and human raters scores of over 150 essays written by both L2 learners of English and native speakers Taken together the volume challenges existing tendencies within the field which attempt to use one method to validate one another by demonstrating their capacity to indicate very different elements of lexical proficiency thereby offering a means by which to better conceptualize performance based assessment of L2 vocabulary in the future This book will be of interest to students and researchers working in second language acquisition and applied linguistics research

particularly those interested in issues around assessment vocabulary acquisition and language proficiency The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a CC BY NC ND 4.0 license
