Agile Processes in Software Engineering and Extreme Programming - Workshops Maria Paasivaara,Philippe Kruchten,2020-09-23 This open access book constitutes the 6 research workshops the Agile Education and Training Track the Doctoral Symposium as well as a panel presented at XP 2020 the 21st International Conference on Agile Software Development which was held during June 8 12 2020 The conference was planned to take place at the IT University of Copenhagen Denmark Due to the COVID 19 pandemic the conference was held online In 2020 the following six workshops took place Third International Workshop on Software Intensive Business Eighth International Workshop on Large Scale Agile Development Second European Symposium on Serverless Computing and Applications Second International Workshop on Agile Transformation First International Workshop on Agility with Microservices Programming Third International Workshop on Autonomous Agile Teams XP is the premier agile software development conference combining research and practice It is a unique forum where agile researchers practitioners thought leaders coaches and trainers get together to present and discuss their most recent innovations research results experiences concerns challenges and trends XP conferences provide an informal environment to learn and trigger discussions and welcome both people new to agile and seasoned agile practitioners The 31 papers presented in this volume were carefully reviewed and selected from overall 79 submissions In addition to the 26 workshop papers this volume also includes 2 papers from the Agile Education and Training Track and 3 papers from the Doctoral Symposium Furthermore the book contains a summary of a panel discussion with the topic Covid 19 s Influence on the Future of Agile *Information Technology and Systems* Alvaro Rocha,Carlos Ferrás,Hiram Calvo,2025-07-26 This book comprises papers written in English and accepted for presentation and discussion at the 2025 International Conference on Information Technology Organizational Models and Information Systems Software and Systems Modeling Software Systems Architectures Applications and Tools Multimedia Systems and Applications Computer Networks Mobility and Pervasive Systems Intelligent and Decision Support Systems Big Data Analytics and Applications Human Computer Interaction Ethics Computers and Security Health Informatics Information Technologies in Education Media Applied Technology and Communication The primary audience for this book includes postgraduate students and researchers in the field of Information Systems and Technologies The secondary audience consists of undergraduate students and professionals working in related domains **Innovations in Software Engineering for Defense Systems** National Research Council,Division on Engineering and Physical Sciences,Committee on Applied and Theoretical Statistics,Division of Behavioral and Social Sciences and Education,Committee on National Statistics,Oversight Committee for the Workshop on Statistical Methods in Software Engineering for Defense Systems,2003-10-22 Recent rough estimates are that the U S Department of Defense DoD spends at least 38 billion a year on the research development testing and evaluation of new defense systems approximately 40 percent of that cost at least 16 billion is spent on software development and testing There

is widespread understanding within DoD that the effectiveness of software intensive defense systems is often hampered by low quality software as well as increased costs and late delivery of software components. Given the costs involved, even relatively incremental improvements to the software development process for defense systems could represent a large savings in funds. And given the importance of producing defense software that will carry out its intended function, relatively small improvements to the quality of defense software systems would be extremely important. To identify DoD software engineers and test and evaluation officials may not be fully aware of a range of available techniques because of both the recent development of these techniques and their origination from an orientation somewhat removed from software engineering. In addition, from a statistical perspective, the panel's charge therefore was to convene a workshop to identify statistical software engineering techniques that could have applicability to DoD systems in development.

Design Thinking for Software Engineering Jennifer Hehn, Daniel Mendez, Walter Brenner, Manfred Broy, 2022-02-13 This book explores the possibility of integrating design thinking into today's technical contexts Despite the popularity of design thinking in research and practice this area is still too often treated in isolation without a clear consistent connection to the world of software development The book presents design thinking approaches and experiences that can facilitate the development of software intensive products and services It argues that design thinking and related software engineering practices including requirements engineering and user centric design UX approaches are not mutually exclusive Rather they provide complementary methods and tools for designing software intensive systems with a human centric approach Bringing together prominent experts and practitioners to share their insights approaches and experiences the book sheds new light on the specific interpretations and meanings of design thinking in various fields such as engineering management and information technology As such it provides a framework for professionals to demonstrate the potential of design thinking for software development while offering academic researchers a roadmap for further research
