
AP Statistics Exam Study Guide 2024 Questions and Answers.

How is a population measured?

a population is measured by a census.

How is a sample measured?

A sample is measured using a sampling technique, of which there are several.

Why do we often measure samples instead of populations?

Collecting data from an entire population is often impossible, infeasible, or beyond the capability of the resources we have available. Samples can supply good *estimates* of the population, and are much easier to collect data for.

Bias

anything that causes a sample to be not representative of the population of interest.
