

Earth's Atmosphere Unit Test Study Guide

Know the definitions of the following terms:

Climate- the characteristic weather conditions in an area over a long period of time.

Air mass- Large body of air. Covers thousands of miles.

Fossil fuels-Fuels formed from the remains of prehistoric organisms that are burned for energy.

Latitude- the distance in degrees north or south from the equator.

Front- boundary between air masses. Fronts are often cloudy or stormy.

Altitude- distance above sea level

Atmosphere- layer of air that surrounds the earth.

Lightning- spark of electricity

Hurricane- low pressure system- winds 74 mph

Tornado- violently rotating column of air- occurs mostly in spring- unpredictable.

Blizzard- blinding snowstorms, winds 35mph, occur in northern and central U.S.A.

Thunder- sharp wave of heated air that travels away from lightning.

Eye of the hurricane-center of storm, calm winds

Storm surge- pushes huge mass of ocean water onto coastal area.

Know the definitions of the three types of energy:

Conduction-transfer of heat energy from one substance to another by direct contact.

Convection-transfer of energy by the motion of gas or liquid. Movement of gases up and down. Warm air rises, cool air sinks.

Radiation- energy that travels distances in waves, can be absorbed or reflected.

Pedagogy in a New Tonality Peter Gouzouasis, 2012-01-01 This is a book for teachers by teachers from elementary school to university level classrooms It is about the use of creative instructional strategies in K 12 classroom settings and the transformations the teachers made in their journeys from being traditional practitioners to becoming pedagogical in their approaches to teaching and learning across the curriculum Over twenty teachers conducted research in their classrooms on the implementation of creative strategies tactics graphics organizers and visual journals in teaching and learning They have written their inquiries in a narrative style informed by various forms of arts based educational research Their research is approachable and usable by other teachers who are interested in becoming reflective reflexive practitioners Many of the strategies tactics and graphics organizers are described by Barrie Bennett in his widely used textbook Beyond Monet The Artful Science of Instructional Intelligence However through their journeys of becoming teacher learner researchers many discovered numerous creative variations of Bennett s work as it was implemented in their classrooms While there are many professional books that provide ideas on collaborative learning and creative teaching approaches there is very little published research on the efficacy of these concepts in the K 12 classroom These inquiries provide practical insights into how inspired teachers can conduct research on improving their own practice as well as on greatly improving their students learning Thus this book has widespread interest for teachers and administrators who seek to implement systemic changes in the ways that

teachers teach and children learn in the 21st century **Computer Operations** Marjorie Leeson,1978 **Resources in Education** ,1976-05 **Teacher's Manual and Resource Guide for Exploring the Sciences** Herbert Drapkin,1964
