High Performance Liquid Chromatography Omar Al Sayed Omar,Moustafa A. Khalifa,2022-02-21 During the past decade modern high performance liquid chromatography HPLC utilization has expanded greatly especially in the quality control of pharmaceutical products in drug quality control laboratories This book provides an extensive collection of technical information about HPLC Columns physicochemical properties and chromatographic characteristics from various manufacturers and helps analysts to decide on the ideal approach for their analysis according to the requirements of drug manufacturers specifi cations and the desired Pharmacopeia In addition the authors give practical advice on how to prepare mobile phases choose a suitable detector and set up an HPLC analysis This book is comprehensive for the average professional or technician who plans to work with

modern HPLC This book is useful for most Drug Quality Control Laboratories where modern HPLC is utilized Following a hands on approach the book gives key insights into the pharmaceutical applications of HPLC and the latest requirements of the major regulatory agencies such as ICH FDA or USP Purification of Laboratory Chemicals W.L.F. Armarego,Christina Chai,2009-07-23 A best seller since 1966 Purification of Laboratory Chemicals keeps engineers scientists chemists biochemists and students up to date with the purification of the chemical reagents with which they work the processes for their purification and guides readerd on critical safety and hazards for the safe handling of chemicals and processes The Sixth Edition is updated and provides expanded coverage of the latest chemical products and processing techniques safety and hazards The book has been reorganised and is now fully indexed by CAS Registry Numbers Compounds are now grouped to make navigation easier and literature references for all substances and techniques have been added and ambiguous alternate names and cross references have been removed The only comprehensive chemical purification reference a market leader since 1966 Amarego delivers essential information for research and industrial chemists pharmacists and engineers it will be the most commonly used reference book in any chemical or biochemical laboratory MDPI Journal An essential lab practice and procedures manual Improves efficiency results and safety by providing critical information for day to day lab and processing work Improved clear organization and new indexing delivers accurate reliable information on processes and techniques of purification along with detailed physical properties The Sixth Edition has been reorganised and is fully indexed by CAS Registry Numbers compounds are now grouped to make navigation easier literature references for all substances and techniques have been added ambiguous alternate names and cross references removed new chemical products and processing techniques are covered hazards and safety remain central to the book Carbon Fibers and Their Composites

Peter Morgan,2005-05-20 Most literature pertaining to carbon fibers is of a theoretical nature Carbon Fibers and their Composites offers a comprehensive look at the specific manufacturing of carbon fibers and graphite fibers into the growing surge of diverse applications that include flameproof materials protective coatings biomedical and prosthetics applications textiles batteries and fuel cells automotive applications construction and even musical instruments This useful guide provides a hands on approach to the fabrication of carbon fibers The book begins with a blueprint of the international history and development of carbon fiber clearly defined terminology for all forms of solid carbon products and the properties for elemental carbon and its allotropic forms It then elaborates upon precursor materials relevant surface treatment and sizing for each carbon fiber type available in the world market Several chapters also examine the types of matrices their properties and fracture mechanics of thermoset and thermoplastic polymers carbon glass metal and ceramics matrices Carbon Fibers and their Composites reveals straightforward guidelines for the day to day operations of a carbon fiber plant such as safety testing quality control design of equipment packaging air flow dust control maintenance and environmental policies Based on over 30 years of experience in the field the author offers insight and possible solutions to the problems associated with

production and testing of carbon fibers and their related composites He details the use of analytical chemistry techniques instrumentation requirements and statistics to evaluate the results Carbon Fibers and their Composites offers an excellent clarification of how carbon fibers yield reinforced composites their physical and chemical characteristics the diverse manufacturing techniques for each type and the advantages they offer to a variety of applications Handbook of Dietary Fiber Susan Sungsoo Cho,2001-08-17 Presents the latest research on the analysis metabolism function and physicochemical properties of fiber fiber concentrates and bioactive isolates exploring the effect of fiber on chronic disease cardiovascular health cancer and diabetes Examines food applications and the efficacy and safety of psyllium sugar beet fiber pectin alginate gum arabic and rice bran **Carbohydrate Analysis** Z. El Rassi,1994-11-11 Carbohydrates and glycoconjugates play an important role in several life processes The wide variety of carbohydrate species and their inherent polydispersity and heterogeneity require separation techniques of high resolving power and high selectivity such as high performance liquid chromatography HPLC and capillary electrophoresis HPCE In the last decade HPLC and recently HPCE methods have been developed for the high resolution and reproducible quantitation of carbohydrates Despite the importance of these two column separation technologies in the area of carbohydrates no previous book describes specialized methods for the separation purification and detection of carbohydrates and glycoconjugates by HPLC and HPCE Therefore the objective of the present book is to provide a comprehensive review of carbohydrate analysis by HPLC and HPCE by covering analytical and preparative separation techniques for all classes of carbohydrates including mono and disaccharides linear and cyclic oligosaccharides branched heterooligosaccharides e g glycans plant derived oligosaccharides glycoconjugates e g glycolipids glycoproteins carbohydrates in food and beverage compositional carbohydrates of polysaccharides carbohydrates in biomass degradation etc The book will be of interest to a wide audience including analytical chemists and biochemists carbohydrate glycoprotein and glycolipid chemists molecular biologists biotechnologists etc It will also be a useful reference work for both the experienced analyst and the newcomer as well as for users of HPLC and HPCE graduates and postdoctoral students
