## **A Question Of Origins Created Or Evolved:**

**A Question of Origins** Shelby MacFarlane, 2005 One of the most controversial subjects of our day is that of origins Did everything in our universe come about as a result of random mechanistic events or does the perfection of our world and larger universe demand an intelligent designer This high school textbook illustrates both sides of the issue first of all explaining what evolution is and what its proponents use as proof and then explaining creationism and its proponents scientific reasons for their position The text also demonstrates the ramifications of a belief in evolution versus a belief in a Creator A valuable companion CD can also be purchased providing teachers parents and students with easy to use supplements such as Vocabulary review Chapter review Concepts maps Tests A Final Exam This subject has too long been neglected by our schools because of a lack of curriculum on a high school level *A Question of Origins* Shelby MacFarlane,

**The Great Creation Debate** Brad Freckleton, 2012-07 Why isn't the evolution of flight shown in the fossil record Bugs birds bats and dinosaurs flew and are shown fully formed in the fossil record but there are no animals with halfway wings in the fossil record leading from ground based animals to flying animals What is desperately wrong with the Grand Canyon if evolution is true Where are the massive signs of erosion between the sedimentary layers of the Grand Canyon if they were laid down a million years at a time Why does massive erosion only show up at the top Animals with well developed eyes show up suddenly in the fossil record as do flying animals It's the norm for plants and animals to show up in the fossil record with the same separations as we see in different types of living animals and plants today The second law of thermodynamics is a law of science that says everything left to its own will wear out run down It is a fundamental law of science So how did evolution accidentally go up How could a DNA molecule fumble together The cell needs DNA DNA needs the cell which came first Beneficial mutations also weaken in other areas and don't write evolutionary advancing DNA code Spiral galaxies which have the shape of a star fish that is spinning quickly throughout our universe like our Milky Way galaxy are supposed to be over 10 billion years old If they were over a billion years old they would lose their spiral arm shape The arms of our galaxy the Milky Way only show a maximum age of 0.3 billion years People want to know why they're here now and where they're going to go They want surety of truth also Read this book and see how well evolution holds up in all the sciences Read this book and see if life can have meaning direction and hope with surety For those who claim to be open minded put on your seatbelts and keep your arms inside as you ride the roller coaster of your own value systems **Creation-Evolution**

**Debates** Ronald L. Numbers, 2021-10-17 Originally published in 1995 *Creation Evolution Debates* is the second volume in the series *Creationism in Twentieth Century America* reissued in 2021 The volume comprises eight debates from the early 1920s and 1930s between prominent evolutionists and creationists of the time The original sources detail debates that took place either orally or in print as well as active debates between creationists over the true meaning of Genesis I The essays in this volume feature prominent discussions between the likes of Edwin Grant Conklin Henry Fairfield Osbourne and William

Jennings Bryan John Roach Francis and Charles Francis Potter George McCready Price and Joseph McCabe and William Bell Riley versus Charles Smith amongst many others The collection will be of especial interest to natural historians and theologians as well as academics of philosophy and history      *Development and Evolution* James Mark Baldwin,1902

Origins Ariel Adrean Roth,1998 Are the worlds of science and religion irreconcilable Has modern science with its theory of evolution disproved the biblical account of the origin of life If one accepts the biblical account of origins does one then have to reject science Scientist and Christian believer Ariel A Roth argues that taken together science and religion give us a more complete and sensible understanding of the world around us our place in it and our ultimate meaning and fate Roth examines such topics as the evidence for evolution and creation the Flood the strengths and limitations of the scientific method and the reliability of Scripture He concludes that the biblical model of a recent creation by God leaves fewer unanswered questions than either science s evolutionary model or any view between the two positions such as progressive creation or theistic evolution Back cover      **The Creation-evolution Controversy** R. L. Wysong,1976 Who has not wondered about the origin of the universe and life And for certain this is a question that should be taken with the utmost seriousness and sense of duty After all how can we know why we are here or what we should be doing if we do not know where we came from Although religions have their belief creation and materialists have their belief evolution beliefs are not what truth is about This is a book of daring adventure between these two emotionally charged belief systems Rather than advocate Dr Wysong pits one belief against the other using the only weapons that should be used if truth is the objective reason and evidence Dr Wysong s rational philosophic and scientific probings make this book a reservoir of thoughtful and factual information that will not draw dust on your bookshelf Now in its thirteenth printing this seminal 1975 book has been read worldwide is widely cited on the web and continues to be used in schools It has helped lay the groundwork for a rational dialogue between religion and science and remains current to this day because of its even handed treatment of the subject and because reason should never fall out of fashion      *A new natural theology based upon the doctrine of evolution* Joseph Morris (fellow of the univ. of Durham.),1896      The Problem of Origins Leander Sylvester Keyser,1926      The Battle of Beginnings Del Ratzsch,2010-02-28 Voted one of Christianity Today s 1997 Books of the Year Creation versus evolution The debate is growing louder and hotter whether in lecture halls or in between the pages of bestselling books But neither side seems to be winning Why In *The Battle of Beginnings* Del Ratzsch examines the history of the debate and critiques the entrenched positions that he argues merely impede progress toward the truth Dissatisfied with both creationist fallacies and materialist misconstruals he seeks to lay the groundwork for more fruitful dialogue In considerable detail Ratzsch looks at the history and development of Darwin s theory and common creationist misunderstandings of evolution He then moves on to examine the history and development of creationist theory and pervasive evolutionist misunderstandings of it He also discusses the nature of science and common creationist and evolutionist abuses as a prelude to showing why both sides have

remained critical of theistic evolution Above all Ratzsch argues that until philosophical confusion logical missteps and various other snarls have been untangled little real progress can be made in sorting out competing theories of life and its origin With this book he challenges and equips all of us to think more clearly     *The Creation of Matter; Or, Material Elements, Evolution, and Creation ...* William Profeit,1904     **The Universal Cyclopaedia** ,1900     *The Universal Cyclopædia* ,1900
