## Automobiles By Architects:

*Automobiles by Architects* Ivan Margolius, 2000-04-06 It may seem extraordinary that architects designers of stationary objects should concern themselves with automobile design but the automobile has long touched architects imaginations appearing to them as a house on wheels as mobile accommodation When the motor driven vehicle was invented architects recognised that its image form and function would affect the quality of people s lives and their surroundings and that to propose an automobile was a way to perfect the synthesis of art design and the latest technology A number of well known architects liked to pair the architecture of their houses with their favourite automobiles in order to illustrate the close functional and aesthetic relationship between them Some believed that their cars had to look becoming to their architecture and included automobiles in perspective views and photographs of their completed buildings the result being a harmonising composition of the two elements that stressed their close affinity The celebrated Ten Automobiles exhibition at the Museum of Modern Art New York in 1953 with its proclamation that automobiles are twentieth century artefacts brought into focus the automobile as an influential design object Architects realised the importance of the automobile as an icon of an era and sought not only to design motorcars but to apply the principles of automotive technology and design to their architecture This book explores automotive design by leading architects such as Frank Lloyd Wright Le Corbusier Walter Gropius Marcel Breuer Adolf Loos Richard Buckminster Fuller Gio Ponti Carlo Mollino Norman Foster Jan Kaplicky and others and its influence on their architecture

**Architecture and Automobiles** Philip Jodidio, 2011 This book explores the interconnected relationship between cars and buildings **Voiture Minimum** Antonio Amado, 2011-02-11 A colorful account of Le Corbusier s love affair with the automobile his vision of the ideal vehicle and his tireless promotion of a design that industry never embraced Le Corbusier who famously called a house a machine for living was fascinated even obsessed by another kind of machine the automobile His writings were strewn with references to autos If houses were built industrially mass produced like chassis an aesthetic would be formed with surprising precision he wrote in Toward an Architecture 1923 In his white phase of the twenties and thirties he insisted that his buildings photographed with a modern automobile in the foreground Le Corbusier moved beyond the theoretical in 1936 entering with his cousin Pierre Jeanneret an automobile design competition submitting plans for a minimalist vehicle for maximum functionality the Voiture Minimum Despite Le Corbusier s energetic promotion of his design to several important automakers the Voiture Minimum was never mass produced This book is the first to tell the full and true story of Le Corbusier s adventure in automobile design Architect Antonio Amado describes the project in detail linking it to Le Corbusier s architectural work to Modernist utopian urban visions and to the automobile design projects of other architects including Walter Gropius and Frank Lloyd Wright He provides abundant images including many pages of Le Corbusier s sketches and plans for the Voiture Minimum and reprints Le Corbusier s letters seeking a manufacturer Le Corbusier s design is often said to have been the inspiration for Volkswagen

s enduringly popular Beetle the architect himself implied as much claiming that his design for the 1936 competition originated in 1928 before the Beetle Amado Lorenzo after extensive examination of archival and source materials disproves this the influence may have gone the other way Although many critics considered the Voiture Minimum a footnote in Le Corbusier s career Le Corbusier did not This book lavishly illustrated and exhaustively documented restores Le Corbusier s automobile to the main text The City After The Automobile Moshe Safdie,Wendy Kohn,2018-02-23 In an age of virtual offices urban flight and planned gated communities are cities becoming obsolete In this passionate manifesto Moshe Safdie argues that as crucibles for creative social and political interaction vital cities are an organic and necessary part of human civilization If we are to rescue them from dispersal and decay we must first revise our definition of what constitutes a city Unlike many who believe that we must choose between cities and suburbs between mass transit and highways between monolithic highrises and panoramic vistas Safdie envisions a way to have it all Effortless mobility throughout a region of diverse centers residential communities and natural open spaces is the key to restoring the rich public life that cities once provided while honoring our profound desire for privacy flexibility and freedom With innovations such as transportation nodes elevated moving sidewalks public utility cars and buildings designed to maximize daylight views and personal interaction Safdie s proposal challenges us all to create a more satisfying and humanistic environment Automobile Architecture Chris van Uffelen,2011 This book is dedicated to architecture that serves the automobile showing esthetic and technical solutions of the past few years from parking garages to gas stations and showrooms Auto-Tecture Andreas K. Vetter,2015 Originally published as *Haus Auto* by Callway Verlag Munich Germany 2011 by Verlag George D W Callwey GmbH Co KG Munich Cars by Architects Power Plant (Art gallery),1988 **The Automotive Manufacturer** ,1908

Journal of the American Institute of Architects ,1924 **Carchitecture** Jonathan Bell,2001 The automobile has brought about changes to the landscape that are nothig short of revolutionary The dramatic reconfiguration of cities and the countryside to accomodate our taste for freedom of movement has been matched by a change in the way buildings themselves have been planned Today CAAD and car building techniques have opened up new possibilities for architectural design and this book edited by the London based architect Alex de Rijke argues taht the influence of the car on architectural and ruan thinking is greater than ever De Rijke s selection of ideas photographs texts and completed projects by a variety of architects explores the parellel development of cars and architecture during the second half of the twentieth century and provides a compelling manifesto for the future of building design The Auto-biography of an Octogenarian Architect, Being: a Record of His Studies at Home and Abroad, During 65 Years, Comprising Among the Subjects George Ledwell Taylor,1870 **Journal of the American Institute of Architects** American Institute of Architects,1924 **The American Architect** ,1910 **Automobiles by Architect** Feijiao Huo,2015 This thesis proposes using the author s experience as an automotive mechanical engineer and an architect to make an automobile designed at RISD **The**

**Auto-biography of an Octogenarian Architect** George Ledwell Taylor,1870      **Havana** Norman Foster,2014-09 In the living theatre that is Havana today the stage is the street the scenery is the facades of buildings and the players who bring the whole drama to life are the colourful cars and people Norman Foster Norman Foster's visits to Havana over the past ten years have enabled him to meet a variety of Cuban artists and architects Inspired by his travels Havana Autos and Architecture features historic and current photographs that allow the reader to marvel over Cuba's love affair with classic cars In it Mauricio Vicent guides us through Cuba's tumultuous history seamlessly blending its automobiles and architecture through the stories of different Havana locals      *The Automobile* ,1904      **Automotive Industries, the Automobile** ,1930

**Architects + Engineers = Structures** Ivan Margolius,2002-05-22 Ivan Margolius introduces a number of architects who throughout history have found inspirational techniques and discovered solutions to structural problems within their architectural projects      **The Michigan Architect and Engineer** ,1929
