A Rough Ride To The Future:

The Breadth of Gaia D.R. Taylor,2020-12-16 Is Gaia the living Earth fighting back Our postmodern world holds the Gaia hypothesis where environmental issues and ecological awareness have been put forth for discussion Climate change the greenhouse effect overpopulation a global water crisis nuclear energy endangered species and fossil fuels are part of the discourse of an ordinary twenty first century citizen Gaia s purpose might be in stopping us in our tracks with the virus depriving us of close social contact of travel and mass consumption as a result of the thousands of years humans have exploited the planet without counting the cost The natural ability of the environment to balance itself and the processes that disrupt the ecological cycles have contributed to the changes in the climate of our planet The need for more natural resources has forced humans to infringe or destroy natural habitats thus exposing us to numerous pathogens The outbreak of Ebola MERS and other coronaviruses have been triggered by the transition from animal to human through the upset of natural habitats The speed from which the virus has spread has surprised many governments putting the economies and millions of people in serious danger The globe is in serious danger Torcello and Mann wrote an article titled Seeing the Covid 19 Crisis Is Like Watching a Time Lapse of Climate Change Will the Right Lessons Be Learned The reality is that the slower we respond the higher the death rate and economic loss

Religion Matters Paul Babie,Rick Sarre,2020-03-02 This book

draws together leaders in science the health sciences the humanities and the social sciences to investigate the role of religion its meaning and relevance for their area of specialization It provides a much needed fresh perspective on the way in which religion operates within the modern neo liberal world The book approaches the topic by way of a critical engagement between religion broadly defined and the individual disciplines in which each of the contributors is expert Rather than simply taking the dogmatic position that religion offers something to every possible discipline each of the chapters in this collection addresses the question is there something that religion can offer to the discipline in question That is the value of the book it takes a truly critical stance on the place of religion in contemporary society

A Rough Ride to the Future James Lovelock,2014-04-03 In A Rough Ride to the Future James Lovelock the great scientific visionary of our age presents a radical vision of humanity s future as the thinking brain of our Earth system James Lovelock who has been hailed as the man who conceived the first wholly new way of looking at life on earth since Charles Darwin Independent and the most profound scientific thinker of our time Literary Review continues in his 95th year to be the great scientific visionary of our age This book introduces two new Lovelockian ideas The first is that three hundred years ago when Thomas Newcomen invented the steam engine he was unknowingly beginning what Lovelock calls accelerated evolution a process which is bringing about change on our planet roughly a million times faster than Darwinian evolution The second is that as part of this process humanity has the capacity to become the intelligent part of Gaia the self regulating Earth system whose discovery Lovelock first announced nearly 50 years ago In addition Lovelock gives his reflections on how scientific advances are made and his

own remarkable life as a lone scientist The contribution of human beings to our planet is Lovelock contends similar to that of the early photosynthesisers around 3 4 billion years ago which made the Earth s atmosphere what it was until very recently By our domination and our invention we are now changing the atmosphere again There is little that can be done about this but instead of feeling guilty about it we should recognise what is happening prepare for change and ensure that we survive as a species so we can contribute to perhaps even guide the next evolution of Gaia The road will be rough but if we are smart enough life will continue on Earth in some form far into the future Elected a Fellow of the Royal Society in 1974 JAMES LOVELOCK is the author of more than 200 scientific papers and the originator of the Gaia Hypothesis now Gaia Theory His many books on the subject include Gaia A New Look at Life on Earth 1979 The Revenge of Gaia 2006 and The Vanishing Face of Gaia 2009 In 2003 he was made a Companion of Honour by Her Majesty the Queen in 2005 Prospect magazine named him one of the world s top 100 public intellectuals and in 2006 he received the Wollaston Medal the highest Award of the UK Geological Society
