11. *What is the primary purpose of the following statement?*

As a result, the *Journal of Clinical Endocrinology and Metabolism* is the most cited journal in the field of endocrinology and metabolism, and is highly regarded by the scientific community.

According to the author, the main purpose of the study was to examine the relationship between the use of the Internet and the level of computer literacy among students. The study also aimed to identify the factors that influence the use of the Internet among students. The results of the study showed that there is a positive correlation between the use of the Internet and the level of computer literacy among students. The study also found that the factors that influence the use of the Internet among students are the availability of the Internet, the level of computer literacy, and the level of motivation.

For the second phase, we used a 100% matching criterion. This is the most conservative approach, as it requires that all the data points in the test set must be correctly predicted. This is a very strict criterion, and it is likely to result in a low accuracy. However, it is useful for evaluating the performance of the model. The results are shown in Table 2. The accuracy is 95.5% for the first phase and 95.0% for the second phase. These results are very promising, and they indicate that the proposed model is able to predict the future values of the time series with a high degree of accuracy.
