Picturing Identity Hertha D. Sweet Wong,2018-05-02 In this book Hertha D Sweet Wong examines the intersection of writing and visual art in the autobiographical work of twentieth and twenty first century American writers and artists who employ a mix of written and visual forms of self narration Combining approaches from autobiography studies and visual studies Wong argues that in grappling with the breakdown of stable definitions of identity and unmediated representation these writers artists experiment with hybrid autobiography in image and text to break free of inherited visual verbal regimes and revise painful histories These works provide an interart focus for examining the possibilities of self representation and self narration the boundaries of life writing and the relationship between image and text Wong considers eight writers artists including comic book author Art Spiegelman Faith Ringgold known for her story quilts and celebrated Indigenous writer

Leslie Marmon Silko Wong shows how her subjects formulate webs of intersubjectivity shaped by historical trauma geography race and gender as they envision new possibilities of selfhood and fresh modes of self narration in word and image

Ideas under Fire Jonathan Lavery, Louis Groarke, William Sweet, 2012-10-26 Since Aristotle's famous declaration that the speculative sciences originated with the emergence of a leisure class it has been accepted as a truism that intellectual activity requires political stability and leisure in order to flourish Paradoxically however some of the most powerful and influential contributions to Western intellectual culture have been produced in conditions that were adverse indeed hostile to intellectual activity Examples include Socrates stirring defense of the examined life before a hostile Athenian jury Boethius writing *The Consolation of Philosophy* under the specter of impending torture and execution Galileo devising key notions for modern mechanics while under house arrest and Jean Paul Sartre drafting portions of *Being and Nothingness* in his war diaries to name only a few of the most famous incidents all extraordinary achievements spawned developed or completed in adversity In cases such as these a philosopher or scientist must manage somehow to remain intellectually creative and focused despite living in conditions that are adverse or hostile to thought In brief they are working on ideas under fire This book is a survey of several momentous cases of philosophers and scientists working under fire Each chapter of *Ideas Under Fire* explores a particular case or set of related cases For each case contributors consider two questions How did the individual at the center of a particular moment of discovery overcome such formidable obstacles to leisure and conceptually abstract thought And how did adversity shape their thinking under fire Each chapter has been written by a specialist on its respective subject and the book covers every period of Western history All the chapters are written in an accessible style that is intended to appeal to both specialists and generalists **School Library Journal** ,2007-09 **Inland Architect** ,1984
