Better Environmental Decisions Better Environmental Decisions:

Better Environmental Decisions Ken Sexton, Alfred A. Marcus, K. William Easter, Timothy D. Burkhardt, 1998-11-01 Better Environmental Decisions responds to the need for improved environmental decision making by bringing together leading scholars and practitioners to provide a comprehensive interdisciplinary introduction to the subject. Each chapter describes an important aspect of environmental decision making, identifies key issues, problems and barriers, and recommends ways to improve both the process and the final result. Topics examined include Congressional decisions about regulatory reform, environmental benefit cost analysis, valuing environmental impacts, comparing risks and setting priorities, strategic environmental management, corporate accounting for environmental and social factors, corporate responses to rules and regulations, community decisions about environmental risks, civic environmentalism, community partnerships with industry and government. Throughout, contributors focus on providing tools to make better decisions and on presenting solutions to real world problems. Better Environmental Decisions describes and analyzes the key decision making criteria of each of the stakeholders involved: governments, businesses and communities, and offers a compendium of techniques necessary for achieving success. It will be a landmark reference and resource for anyone involved with environmental decisionmaking, including legislators, regulators, business and environmental managers, environmental advocates, community activists, reporters, researchers, educators and students.

O Wechsel ist denn hier der Orth.... , 1680 Democracy in Practice

Thomas C. Beierle, 2010-09-30 In spite of the expanding role of public participation in environmental decisionmaking, there has been little systematic examination of whether it has to date contributed toward better environmental management. Neither have there been extensive empirical studies to examine how participation processes can be made more effective. Democracy in Practice brings together for the first time the collected experience of 30 years of public involvement in environmental decisionmaking. Using data from 239 cases, the authors evaluate the success of public participation and the contextual and procedural factors that lead to it. Thomas Beierle and Jerry Cayford demonstrate that public participation has not only improved environmental policy but it has also played an important educational role and has helped resolve the conflict and mistrust that often plague environmental issues. Among the authors' findings are that intensive problem solving processes are most effective for achieving a broad set of social goals and participant motivation and agency responsiveness are key factors for success. Democracy in Practice will be useful for a broad range of interests. For researchers, it assembles the most comprehensive data set on the practice of public participation and presents a systematic typology and evaluation framework. For policymakers, political leaders and citizens, it provides concrete advice about what to expect from public participation and how it can be made more effective. Democracy in Practice concludes with a systematic guide for use by government agencies in their efforts to design successful public participation efforts.

Toward Improved Environmental Decisions

,2001 A common feature of many of the current environmental issues is that the immediate impact of risks although considered to be small by many scientists are uncertain and potentially wide spread and significant in the long term and thus of concern to potentially affected groups The need to formulate decisions and commit major resources in the face of these uncertainties has led to the introduction of new environmental decision making frameworks that have as a central feature consideration of the broader environmental context and a greater involvement of the affected parties in the process Various research activities and case studies are described which are targeted at aiding further development of the decision making frameworks into a more widely useable and effective approach

Information Systems and the Environment National

Academy of Engineering, 2001-08-27 Information technology is a powerful tool for meeting environmental objectives and promoting sustainable development. This collection of papers by leaders in industry, government and academia explores how information technology can improve environmental performance by individual firms, collaborations among firms and collaborations among firms, government agencies and academia. Information systems can also be used by nonprofit organizations and the government to inform the public about broad environmental issues and environmental conditions in their neighborhoods. Several papers address the challenges to information management posed by the explosive increase in information and knowledge about environmental issues and potential solutions including determining what information is environmentally relevant and how it can be used in decision making. In addition, case studies are described and show how industry is using information systems to ensure sustainable development and meet environmental standards. The book also includes examples from the public sector showing how governments use information knowledge systems to disseminate best practices beyond big firms to small businesses and from the world of the Internet showing how knowledge is shared among environmental advocates and the general public. Why Good People Do Bad Environmental Things Elizabeth R.

DeSombre, 2018 Why do people behave in ways that cause environmental harm? Despite not wanting to create environmental problems, we all do so regularly in the course of living our everyday lives. This book looks at how social structures, incentives, information, habits, attitudes, norms, and the inherent characteristics of environmental resources explain and influence how we behave and how those causes influence what we can do to change behavior.
