Better Library Design Rebecca T. Miller, Barbara A. Genco, 2015-12-28 Few librarians build more than one library in their careers and renovating or building a whole new library is a very expensive investment. Thus new or refurbished structures need to be fresh and up to date. While some librarians have the means to visit exemplary buildings as they develop their own library's master plan, most library leaders and stakeholders won't actually see the full range of potential projects. Hence this unique book is both a resource and a brainstorm prompt. It helps library leaders and key stakeholders surface the ideal programmatic aspects that drive exciting design and offer recent design solutions that have been effectively implemented. *Better Library Design Ideas from Library Journal* identifies and celebrates the top trends in library design, capturing current state and providing an authoritative overview for those planning their own projects. This is a colorful, high-content survey of dynamic library building projects completed in the last five years in both public and academic settings. Anchored by Library Journal's New Landmark Libraries competition, here is the nation's best examples of innovative, functional, appealing design, all in glorious full color so you'll be both inspired and informed as you make important design choices.

Planning Optimal Library Spaces David R. Moore, II, Eric C. Shoaf, 2018-01-25 *Planning Optimal Library Spaces: Principles, Process, and Practices* demystifies library space planning, inspires creative thinking, and offers immediate how-to steps to rectify seemingly hopeless situations. It describes an approach to library space planning that introduces and combines a phased implementation strategy with traditional space planning to allow library transformations and renovations to be done as a single project or a series of smaller, separate and more manageable phased interventions. It allows libraries to meet current needs sooner as smaller funding opportunities arise instead of waiting on completely funded projects to develop. Chapters cover the approach, the importance of community engagement, meetings, collection storage strategies, the anatomy of a library project budget, recommendations for getting started, and case studies of both public and academic library planning projects with detailed phasing strategies. Printed in full color with 148 images, this is a must-have book for librarians, architects, government, education administrators, and anyone involved with or even thinking about a library planning or renovation project.

The No-Nonsense Guide to Project Management Barbara Allan, 2017-07-24 This book provides a no-nonsense guide to project management which will enable library and information professionals to lead or take part in a wide range of projects from large-scale, multi-organization complex projects through to relatively simple local ones. Barbara Allan has fully revised and updated her classic 2004 title *Project Management* to incorporate considerable developments during the past decade, including the development and wide-scale acceptance of formal project management methodologies, the use of social media to communicate and disseminate information about projects, and the large shift in the types of project library and information workers may be involved in. The text is supported by practical case studies drawn from a wide range of LIS organizations at local, regional, national, and international levels. These examples provide an insight into good practice for the practitioner from

an individual working in a voluntary organization on an extremely limited budget to someone involved in an international project Content covered includes an introduction to project management project workers and the library and information profession different approaches to project management the project cycle the people side of projects and management of change discussion of project methodologies project management software open source software collaborative working software and use of social media project initiation communication analysis and project briefs developing project infrastructure scheduling working out the finances and carrying out a detailed risk analysis working in partnerships in diverse and virtual teams and managing change If you are an LIS professional involved in project work of any kind whether on a managerial practical academic or research level this is an invaluable resource for you

Libraries of Light Alistair Black, 2016-10-04 For the first hundred years or so of their history public libraries in Britain were built in an array of revivalist architectural styles This backward looking tradition was decisively broken in the 1960s as many new libraries were erected up and down the country In this new Routledge book Alistair Black argues that the architectural modernism of the post war years was symptomatic of the age's spirit of renewal In the 1960s public libraries truly became libraries of light and Black further explains how this phrase not only describes the shining new library designs with their open plan decluttered Scandinavian inspired designs but also serves as a metaphor for the public library's role as a beacon of social egalitarianism and cultural universalism A sequel to Books Buildings and Social Engineering 2009 Black's new book takes his fascinating story of the design of British public libraries into the era of architectural modernism

Creating the High-Functioning Library Space Marta Mestrovic Deyrup, 2016-11-14 This book provides practical information and insights to library administrators and building plan team members at academic and public libraries who are considering or starting a library expansion or reconfiguration of existing space Building a new library or expanding or renovating an existing building brings up a host of questions and concerns not the least of which involves the future of the library This book addresses those issues in light of an overarching positive vision of libraries and their evolving purposes and roles in the 21st century This guide identifies and addresses all of the steps in the building process including preparing the request for proposal RFP selecting the right architect for the job developing a financial contingency plan and managing stakeholders expectations The book presents both the perspectives and experience of library administrators and management personnel as well as the insights of accomplished library architects and designers It provides thorough practical and current guidance in a process that library administrators often find daunting and risk immersive Reading this book is like sitting down with a knowledgeable impartial consultant

before beginning a major renovation project a tremendous asset for library administrators as well as architectural firms
