After making these necessary changes, the resulting outcomes are the new state, with outcomes either the same (unchanged) or different (changed). Some actions are considered to be more effective than others in changing the environment. Each action resulting in a change is a process.</p> <p>Explain the relationship between these items and consider the following to understand the logic behind these actions. The outcomes (outcomes) represent the resulting process. Identify the process steps in the following sequence of actions.</p> <p>Actions can be used to implement the outcomes. For example, putting power with a small design under a company logo, while putting a larger one under a different logo, changing a company's logo, or changing a company's logo with a very different logo. Other than multiple items, one action can affect another. For example, changing a company's logo will also change its name. These changes will change the environment, resulting in the outcomes of the actions. Understanding outcomes when applying these items can support the outcomes. It can also show the effects of actions over different time conditions.</p> <p>Mark the strongest similarity for each question.</p> <p>1. What does this do to the environment?</p> <p>A. This action makes the environment</p> <p>B. This action makes the environment</p> <p>C. This action makes the environment</p> <p>D. This action makes the environment</p> <p>2. What does this change in the environment?</p> <p>A. It increases</p> <p>B. It decreases</p> <p>C. It remains</p> <p>D. It decreases</p> <p>3. What outcome does this action result in changing the environment?</p> <p>A. No change</p> <p>B. No change</p> <p>C. No change</p> <p>D. No change</p>
