## Where are all the cups?

Intro

Thesis  
statement

The environmental issues in today's world are growing more serious by the day. As a result, it is increasingly important for schools and colleges to teach good environmental habits. Have you ever seen a student or teacher take a sip of water and throw the plastic cup away? This is not a good habit. We must take action to lessen our impacts on the environment. **One way is to stop making plastic cups available to the students at schools.**

Reason 1

**One main reason is that using plastic cups is bad for the environment.** Firstly, making the cups creates dangerous greenhouse gases. For each cup, energy is required to both create the cup and transport the cup from the factory to the college. The use of electricity to make the cups and the gasoline to move them, all come from oil, which is the number one contributor to greenhouse gasses. Greenhouse gases cause global warming. Secondly, as we can see the cups are often not placed properly in the bin and they end up blown into the ocean. This is a serious problem because as the plastic slowly breaks down into small particles, it makes its way into the fish. If the fish have too much plastic in them, they will perish.

Body

Reason 2

**It is also clear that getting rid of the plastic cup will be good for the college.** Firstly, as stated earlier, the cups are not thrown in the bin properly and this creates a negative impression for people who visit the college. For example, if you look in the empty classroom in the late afternoon, the cups are scattered around the college – on the floor, desks, and hallways. This does not give the college a good image with

Refutation

**Many may argue that it is unfair to get rid of the cups.** After all, people need to drink water right? I understand this point of view. However, instead of using the cups, the students can bring in their own water bottles which cost very little. The inconvenience of the water bottles far outweighs the negative effects on the environment. Others may argue the getting rid of the cups might have a negative impact on the economy. I can see that this is a concern for everybody who needs a job. We must, however as a country look for sustainable job creation. This means that we need to always seek ways to create jobs that are eco-friendly, like making solar panels or the material to use wind energy. Certainly, if we invest in earth-friendly jobs, we will all be better off in the future.

Thesis  
restatement

**Finally, it is clear the cups must go to the university.** To use the cups is an old concept that may have been acceptable in the 70's-80's but not anymore. We must change our ways and starting with the cups here at the university is certainly a reasonable start.
