**Corporate Law and Climate Change** Andrew Clarke,2024-08-26 This book provides an analysis of the impact of the climate crisis on corporate law and theory in the coming decades as the world seeks to meet the target of net zero carbon emissions by 2050 Net zero targets are a particular challenge for an economy such as Australia which has a historical reliance on fossil fuels and powerful interests arguing for the continued use of coal and gas The book examines four recent corporate case studies in Australia The first two follow the Adani group of companies and coal in Queensland and Rio Tinto and the destruction of ancient rock shelters in the midst of iron ore mining in WA The book then covers the pension fund member Mark McVeigh issuing proceedings against REST super in relation to long run investment decisions and the need to take into account climate risk Finally it discusses Sharma a representative action taken by school children against the

Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals. These libraries often offer academic texts, research papers, and technical manuals, making them invaluable resources for students and researchers.
