## **Argument Structure Current Studies In:**

**Argument Structure** Eric J. Reuland, Tanmoy Bhattacharya, Giorgos Spathas, 2007 Recent developments in the generative tradition have created new interest in matters of argument structure and argument projection giving prominence to the discussion on the role of lexical entries. Particularly the more traditional lexicalist view that encodes argument structure information on lexical entries is now challenged by a syntactic view under which all properties of argument structure are taken up by syntactic structure. In the light of these new developments the contributions in this volume provide detailed empirical investigations of argument structure phenomena in a wide range of languages. The contributions vary in their response to the theoretical questions and address issues that range from the role of specific functional heads and the relation of argument projection with syntactic processes to the position of argument structure within a broader clausal architecture and the argument structure properties of less studied categories

### **Crosslinguistic Perspectives on**

**Argument Structure** Melissa Bowerman, Penelope Brown, 2008 This book offers a unique interdisciplinary perspective on argument structure and its role in language acquisition. The volume is the outcome of an integrated research project and comprises chapters by both specialists in first language acquisition and field linguists working on a variety of lesser known languages. Drawing on a broad range of crosslinguistic data Crosslinguistic Perspectives on Argument Structure integrates important contemporary issues in linguistics and language acquisition

### **Current Studies in Slavic Linguistics** Irina Kor Chahine, 2013-12-15

This volume represents an overview of current research on Slavic linguistics in Europe and North America based on selected papers presented during the 6th Annual Meeting of the Slavic Linguistics Society September 1-3 2011 Aix en Provence France. It includes topics across a range of linguistic fields morphosyntax, syntax and semantics and discussions on specific aspects of Slavic languages within a typological perspective. All the papers illustrate a range of approaches and each paper presents rigorous analysis of a set of Slavic data within the context of various models and aspects of language. While the main focus of the collection is impersonal constructions in Slavic languages the book also includes morphological topics such as reflexives, antipassive and evidential markers, syntactical relations with zero sign auxiliary verbs and subordinate clauses and semantics of nouns, adverbs and adjectives. The volume will be of interest to all scholars studying Slavic languages as well as those interested in general linguistics and linguistic typology

### **International Handbook of**

**Language Acquisition** Jessica Horst, Janne von Koss Torkildsen, 2019-05-01 How do children acquire language? How does real life language acquisition differ from results found in controlled environments? And how is modern life challenging established theories? Going far beyond laboratory experiments the International Handbook of Language Acquisition examines a wide range of topics surrounding language development to shed light on how children acquire language in the real world. The foremost experts in the field cover a variety of issues from the underlying cognitive processes and role of language input to development of key language dimensions as well as both typical and atypical language development. Horst and Torkildsen

balance a theoretical foundation with data acquired from applied settings to offer a truly comprehensive reference book with an international outlook The International Handbook of Language Acquisition is essential reading for graduate students and researchers in language acquisition across developmental psychology developmental neuropsychology linguistics early childhood education and communication disorders *Arguments and Case* Eric J. Reuland,2000 The ideas presented by the contributions in this volume originated in a workshop on Burzio's generalization Burzio's Generalization BG states that a verb which does not assign an external theta role to its subject does not assign structural accusative Case to an object and conversely It connects cross linguistic similarities between e g passives raising verbs and unaccusatives However it does so by linking very different properties of a predicate This raises fundamental questions about its theoretical status The contributions in this volume explore BG's theoretical basis A consensus emerges that BG is in fact an epiphenomenon due to the interaction of different principles of grammar Moreover the contributions show a striking convergence as to how BG is ultimately derived The results obtained make a significant contribution to the further development of theories of Case and thematic relations *Head-Driven Phrase Structure Grammar* Stefan Müller,Anne Abeillé,Robert D. Borsley,Jean-Pierre Koenig,2024-11-07 Head Driven Phrase Structure Grammar HPSG is a constraint based or declarative approach to linguistic knowledge which analyses all descriptive levels phonology morphology syntax semantics pragmatics with feature value pairs structure sharing and relational constraints In syntax it assumes that expressions have a single relatively simple constituent structure This volume provides a state of the art introduction to the framework Various chapters discuss basic assumptions and formal foundations describe the evolution of the framework and go into the details of the main syntactic phenomena Further chapters are devoted to non syntactic levels of description The book also considers related fields and research areas gesture sign languages computational linguistics and includes chapters comparing HPSG with other frameworks Lexical Functional Grammar Categorial Grammar Construction Grammar Dependency Grammar and Minimalism *Verbal Projections* Hero Janßen,2011-04-20 This collection of articles examines lexical and grammatical aspects of verbal elements and phrases in the context of recent generative research General questions concern definitions of grammatical categories classifications of auxiliaries and particles as functional categories and problems of economy Lexical matters range from affixation and category change participles gerunds to semantic representations of specific verb classes possessive phrasal and intransitive verbs The syntactic analyses focus on positional arrangements of aspectual and verbal units V2 Verb Raising The data are mainly drawn from English perspectives on other Germanic languages are included *The Structure of Argument* Annette T.
