Alcolock Installation Manual:

Strengthening Road Safety Legislation World Health Organization, 2013 This manual describes methods and resources for practitioners and decision makers to use for enacting new laws or regulations or amending existing ones as part of a comprehensive road safety strategy. The manual covers steps to be taken to address five main risk factors and post crash care. It can therefore be used to develop an understanding of the framework of legislation and relevant processes that are applicable in a country to review current national legislation and regulations and identify gaps that hinder implementation and enforcement of effective road safety measures. Identify available resources including international agreements, evidence based guidance and recommendations on effective measures to improve legislation, prepare action plans to strengthen national legislation and regulations for the five main risk factors and for post crash care including advocating for improvement. Other important topics should also be addressed to achieve a comprehensive national system of road safety legislation and regulation however they are beyond the scope of this manual. They include vehicle and helmet manufacturing standards and testing, third party insurance, victim's rights and compensation, a graduated driver licensing system, road audits and design standards and driving hours for commercial drivers.
