Algebra II N. Bourbaki,2003-04-16 This is a softcover reprint of chapters four through seven of the 1990 English translation of the revised and expanded version of Bourbaki s Algebre Much material was added or revised for this edition which thoroughly establishes the theories of commutative fields and modules over a principal ideal domain   **Elements of Mathematics** Nicolas Bourbaki,1990   *Elements of Mathematics* Nicolas Bourbaki,1990   **Algebra II** ,1990

Algebraic Groups and Number Theory: Volume 1 Vladimir Platonov,Andrei Rapinchuk,Igor Rapinchuk,2023-09-07 The first edition of this book provided the first systematic exposition of the arithmetic theory of algebraic groups This revised second edition now published in two volumes retains the same goals while incorporating corrections and improvements as well as new material covering more recent developments Volume I begins with chapters covering background material on number theory algebraic groups and cohomology both abelian and non abelian and then turns to algebraic groups over locally compact fields The remaining two chapters provide a detailed treatment of arithmetic subgroups and reduction theory in both the real and adelic settings Volume I includes new material on groups with bounded generation and abstract arithmetic groups With minimal prerequisites and complete proofs given whenever possible this book is suitable for self study for graduate students wishing to learn the subject as well as a reference for researchers in number theory algebraic geometry and related areas   **Algebraic Groups and Number Theory** Vladimir Petrovich Platonov,Vladimir Platonov,Andrei Rapinchuk,Igor Rapinchuk,2023-09-07 The first volume of a two volume book offering a comprehensive account of the arithmetic theory of algebraic groups   **Elements of Mathematics** Nicolas Bourbaki,1990   A Course in Commutative Algebra Gregor Kemper,2010-12-02 This textbook offers a thorough modern introduction into commutative algebra It is intented mainly to serve as a guide for a course of one or two semesters or for self study The carefully selected subject matter concentrates on the concepts and results at the center of the field The book maintains a constant view on the natural geometric context enabling the reader to gain a deeper understanding of the material Although it emphasizes theory three chapters are devoted to computational aspects Many illustrative examples and exercises enrich the text   **Field Theory** I. S. Luthar,Inder Bir S. Passi,2004 Starting with the basic notions and results in algebraic extensions in this final volume the authors give an exposition of the work of Galois on the solubility of equations by radicals including Kummer and Artin Schreier extensions before providing an extensive study on field theory   Algebra and Coding Theory A. Leroy,S. K. Jain,2023-05-01 This volume contains the proceedings of the Virtual Conference on Noncommutative Rings and their Applications VII in honor of Tariq Rizvi held from July 5 7 2021 and the Virtual Conference on Quadratic Forms Rings and Codes held on July 8 2021 both of which were hosted by the Universit d Artois Lens France The articles cover topics in commutative and noncommutative algebra and applications to coding theory In some papers applications of Frobenius rings the skew group rings and iterated Ore extensions to coding theory are discussed Other papers discuss classical topics such

as Utumi rings Baer rings nil and nilpotent algebras and Brauer groups Still other articles are devoted to various aspects of the elementwise study for rings and modules Lastly this volume includes papers dealing with questions in homological algebra and lattice theory The articles in this volume show the vivacity of the research of noncommutative rings and its influence on other subjects   Spectral Spaces Max Dickmann,Niels Schwartz,Marcus Tressl,2019-03-21 Spectral spaces are a class of topological spaces They are a tool linking algebraic structures in a very wide sense with geometry They were invented to give a functional representation of Boolean algebras and distributive lattices and subsequently gained great prominence as a consequence of Grothendieck s invention of schemes There are more than 1 000 research articles about spectral spaces but this is the first monograph It provides an introduction to the subject and is a unified treatment of results scattered across the literature filling in gaps and showing the connections between different results The book includes new research going beyond the existing literature answering questions that naturally arise from this comprehensive approach The authors serve graduates by starting gently with the basics For experts they lead them to the frontiers of current research making this book a valuable reference source   **On the Symplectic Type of Isomorphisms of the p-Torsion of Elliptic Curves** Nuno Freitas,Alain Kraus,2022-05-24 View the abstract   **Frobenius Distributions: Lang-Trotter and Sato-Tate Conjectures** David Kohel,Igor Shparlinski,2016-04-26 This volume contains the proceedings of the Winter School and Workshop on Frobenius Distributions on Curves held from February 17 21 2014 and February 24 28 2014 at the Centre International de Rencontres Math matiques Marseille France This volume gives a representative sample of current research and developments in the rapidly developing areas of Frobenius distributions This is mostly driven by two famous conjectures the Sato Tate conjecture which has been recently proved for elliptic curves by L Clozel M Harris and R Taylor and the Lang Trotter conjecture which is still widely open Investigations in this area are based on a fine mix of algebraic analytic and computational techniques and the papers contained in this volume give a balanced picture of these approaches   Elements of Mathematics Nicolas Bourbaki,1990   **Algebra** Nicolas Bourbaki,1990   **Algebra II** N. Bourbaki,1990-11-12 This is a softcover reprint of chapters four through seven of the 1990 English translation of the revised and expanded version of Bourbaki s Algebre Much material was added or revised for this edition which thoroughly establishes the theories of commutative fields and modules over a principal ideal domain   **Manuscripta Mathematica** ,1990   **Mathematics Magazine** ,1996   *Elements of Mathematics* ,1990   **Acta Scientiarum Mathematicarum** József Attila Tudományegyetem,1991
