

**Variable:** A quantity that is represented by a letter or symbol that is unknown, unspecified, or can change within the context of a problem.

**Term:** A single number or combination of numbers and variables using exclusively multiplication or division. This definition will expand when we introduce higher-level functions.

**Expression:** A combination of terms using addition and subtraction.

**Exercise #1:** Consider the expression  $2x^2 + 3x - 7$ .

(a) How many terms does this expression contain?

3 terms

(b) Evaluate this expression, without your calculator, when  $x = -3$ . Show your calculations.

$$2(-3)^2 + 3(-3) - 7$$

$$\underline{2(9)} + \underline{3(-3)} - 7$$

18  $\underline{-9}$   $\underline{-7}$

(c) What is the sum of this expression with the expression  $5x^2 - 12x + 2$ ?

$$\begin{array}{r} 5x^2 - 12x + 2 + 2x^2 + 3x - 7 \\ \hline 7x^2 - 9x - 5 \end{array}$$

#### LIKE TERMS

**Like Terms:** Two or more terms that have the same variables raised to the same powers. In like terms, only the coefficients (the multiplying numbers) can differ.

**Exercise #2:** Most students learn that to add two like terms they simply add the coefficients and leave the variables and powers unchanged. But, why does this work? Below is an example of the technical steps to combine two like terms. What real number property justifies the first step?

Steele,Miriam Gamoran Sherin,2020-02-26 This book makes the five practices accessible for high school mathematics teachers Teachers will see themselves and their classrooms throughout the book High school mathematics departments and teams can use this book as a framework for engaging professional collaboration I am particularly excited that this book situates the five practices as ambitious and equitable practices Robert Q Berry III NCTM President 2018 2020 Samuel Braley Gray Professor of Mathematics Education University of Virginia Take a deeper dive into understanding the five practices anticipating monitoring selecting sequencing and connecting for facilitating productive mathematical conversations in your high school classrooms and learn to apply them with confidence This follow up to the modern classic 5 Practices for Orchestrating Productive Mathematics Discussions shows the five practices in action

in high school classrooms and empowers teachers to be prepared for and overcome the challenges common to orchestrating math discussions. The chapters unpack the five practices and guide teachers to a deeper understanding of how to use each practice effectively in an inquiry oriented classroom. This book will help you launch meaningful mathematical discussion through Key questions to set learning goals, identify high level tasks, anticipate student responses and develop targeted assessing and advancing questions that jumpstart productive discussion before class begins. Video excerpts from real high school classrooms that vividly illustrate the five practices in action and include built in opportunities for you to consider effective ways to monitor students ideas and successful approaches for selecting, sequencing and connecting students ideas during instruction. Pause and Consider prompts that help you reflect on an issue and in some cases draw on your own classroom experience prior to reading more about it. Linking To Your Own Instruction sections help you implement the five practices with confidence in your own instruction. The book and companion website provide an array of resources including planning templates, sample lesson plans, completed monitoring tools and mathematical tasks. Enhance your fluency in the five practices to bring powerful discussions of mathematical concepts to life in your classroom.

[Algebra II - Common Core State Standards](#) Castle Rock Research Corp, 2014 A comprehensive mathematics study guide that helps students, educators and parents alike navigate the new Common Core State Standards. With content developed by a team of teachers and curriculum specialists and reviewed by assessment experts with a minimum of five years of classroom teaching experience, SOLARO mathematics study guides are wholly curriculum aligned and serve as an excellent source of material for review and practice. Each guide breaks down the Common Core State Standards into teachable units making it simple for educators and students to identify key learning concepts and how they align with the accompanying exercises and assessments. The practice questions and sample tests have detailed solutions that show problem solving methods, highlight concepts that are likely to be tested and point out potential sources of errors. The multiplatform SOLARO study solution also features additional learning tools in the accompanying online version that allows educators to manage all of their classes with an intuitive interface through mobile apps or any web browser and offers parents a free and easy to use online account thus ensuring that children, educators and parents alike are engaged in helping students achieve success. Developed for high school students who are learning the new Common Core State Standards, this study guide focuses on the mathematical concepts which are required learning for this segment of the curriculum. It includes sections such as Operations with Complex Numbers, Structure of Expressions, Working with Polynomials, Solving Equations by Reasoning, Modeling Periodic Phenomena, Trigonometric Identities, Building Functions and Single Variable Data.
