Active Radar Cross Section Reduction Active Radar Cross Section Reduction:

Active Radar Cross Section Reduction Hema Singh, Rakesh Mohan Jha, 2015-03-02 This book discusses the active and passive radar cross section RCS estimation and techniques to examine the low observable aerospace platforms. It begins with the fundamentals of RCS followed by the dielectric magnetic and metamaterials parameters of the constituent materials and then explains various methods and the emerging trends followed in this area of study. The RCS estimation of phased array including the mutual coupling effect is also presented in detail in the book. The active RCS reduction is carefully touched upon through the performance of phased arrays sidelobe cancellers and mitigation of multipath effect. Providing information on various adaptive algorithms like least mean square LMS recursive least square RLS and weighted least square algorithms the authors also mention the recent developments in the area of embedded antennas conformal load bearing antenna metamaterials and frequency selective surface FSS based RCS reduction , Electromagnetic Nanomaterials Inamuddin, Tariq Altalhi, 2023-10-17 ELECTROMAGNETIC METAMATERIALS The book presents an overview of metamaterials current state of development in several domains of application such as electromagnetics electrical engineering classical optics microwave and antenna engineering solid state physics materials sciences and optoelectronics. Metamaterials have become a hot topic in the scientific community in recent years due to their remarkable electromagnetic properties. Metamaterials have the ability to alter electromagnetic and acoustic waves in ways that bulk materials cannot. Electromagnetic Metamaterials Properties and Applications discusses a wide range of components to make metamaterial engineered devices. It gives an overview of metamaterials current stage of development in a variety of fields such as remote aerospace applications medical appliances sensor detectors and monitoring devices of infrastructure crowd handling smart solar panels radomes high gain antennas lens high frequency communication on the battlefield ultrasonic detectors and structures to shield from earthquakes. Audience Researchers and engineers in electromagnetic and electrical engineering classical optics microwave and antenna engineering solid state physics materials sciences and optoelectronics *Technical Abstract Bulletin* , **Radar and Laser Cross Section Engineering** David C. Jenn, 2005 There have been many new developments in the ten years since the first edition of Radar and Laser Cross Section Engineering was published. Stealth technology is now an important consideration in the design of all types of platforms. The second edition includes a more extensive introduction that covers the important aspects of stealth technology and the unique tradeoffs involved in stealth design. Prediction reduction and measurement of electromagnetic scattering from complex three dimensional targets remains the primary emphasis of this text developed by the author from courses taught at the Naval Postgraduate School. New topics on computational methods like the finite element method and the finite integration technique are covered as well as new areas in the application of radar absorbing material and artificial metamaterials. Matlab registered software homework problems and a solution manual available to instructors supplement the text. Written as an instructional text this book is
