

BRIEF COGNITIVE RATING SCALE (BCRS)**Guidelines for Using the BCRS**

The BCRS is an assessment tool to be used with the Global Deterioration Scale (GDS) to help stage a person suffering from a primary degenerative dementia such as Alzheimer's disease. Developed by Dr. Barry Reisberg, this assessment tool tests 5 different areas known as Axis (4 cognitive and 1 functional). For the first 4 axis, the tester will ask a variety of questions to determine the level of impairment (see Guidelines for Scoring BCRS at the bottom of this page). The results of the 5th axis (Functioning) are determined primarily by observation. Tester can use the Functional Assessment Staging test (FAST) for a more accurate assessment. After a score is determined for each Axis, total the results and divide by 5. This answer will result in a stage corresponding on the GDS.

Psychiatric-mental Health Nursing, Louise Rebraca Shives, Fourth Edition Katy R. Reynolds, Shives, 1998 Scales for Assessment of Diagnosis and Severity of Mental Disorders Per Bech, 1993 The Practical Handbook of Clinical Gerontology Laura L. Carstensen, Barry A. Edelstein, Laurie Dornbrand, 1996-06-24

Applied gerontology and geriatrics always entail a multidisciplinary perspective and usually demand an interdisciplinary treatment approach. Providing a unique combination of perspectives, treatment approaches, and expertise, *The Practical Handbook of Clinical Gerontology* explores issues relevant to practitioners who work with the elderly. A leading cast of contributors representing the fields of psychology, medicine, neuropsychology, nursing, and law examines what is known about specific disorders and discusses treatment techniques and the development of intervention plans. This comprehensive volume begins with an overview of several broad topics pertinent to the treatment of older adults and discusses special considerations in assessment. It then presents up-to-date information on treatment of specific psychological and behavioral disorders of older adults. The final section covers interdisciplinary issues including information about common medical problems, rehabilitation, and the psychopharmacological treatment of mental health problems. Written in a language that is accessible to a general health care audience, this extensive volume will be a valuable resource for mental health care providers, medical students, researchers, and graduate students in such fields as geriatrics, gerontology, nursing, psychology, and social work. Please note the following three quotes are from the same person: This handbook has a variety of attributes that make it a highly desirable desk reference for today's mental health practitioners in geriatrics and gerontology. Few stones have been left unturned in the 22 reader-friendly chapters that comprise the handbook. Not only are general treatment issues addressed in great detail, but assessment procedures, the treatment of specialized psychological and behavioral problems, and even issues in effective collaboration with medical geriatricians are considered. The scope and breadth of clinical knowledge and wisdom found within the covers of this volume are certainly impressive. Lenard W. Kaye, Professor, Bryn Mawr College. The authors have succeeded in drawing on the expertise of a broad range of recognized authorities in clinical gerontology who have the capacity to communicate to the reader with considerable clarity both current information and best practice strategies of mental health intervention with older adults. Lenard W. Kaye, Professor, Bryn Mawr College. It would be difficult to find another reference source in clinical gerontological practice that is able to deal with the challenges of practice in this area with greater comprehensiveness and authority. The multidisciplinary perspective of the handbook ensures it being a valuable addition to the clinical practice collections of psychologists, social workers, nurses, gerontologists, and other allied health professionals. And once obtained, it should not gather dust given the currency and utility of the information. Lenard W. Kaye, Professor, Bryn Mawr College.
