**PR Interval** = time from P wave to QRS complex.  
**QRS Complex** = ventricular depolarization.  
**ST Segment** = ventricular repolarization.  
**T-Wave** = polarization of upper heart.

*ICED-QA 2019* Yulia Hendri Yeni, Handoko, Elizabeth Campbell-Dorning, 2021-04-02 The quality improvement of higher education is needed to guarantee the quality of the graduates for the future competitiveness. Due to the local and global changes and the issue of Industrial Revolution 4.0, higher education needs to comply with the paradigm. Labor requirement's competence requires curriculum reformation from input based education to outcome based education. In learning the paradigm, friction appears from instructional paradigm to learning paradigm. To solve the related proportion, LP3M Institute of Educational Development and Quality Assurance Universitas Andalas initiated the International Conference on Educational Development and Quality Assurance ICED QA 2. This conference was attended by experts and researchers from different countries to discuss the issues about Educational Quality Development in Industrial Revolution 4.0.

[Handbook of Educational Psychology and Students with Special Needs](#) Andrew J. Martin, Rayne A. Sperling, Kristie J. Newton, 2020-02-18. *Handbook of Educational Psychology and Students with Special Needs* provides educational and psychological researchers, practitioners, policy makers, and graduate students with critical expertise on the factors and processes relevant to learning for students with special needs. This includes students with attention deficit hyperactivity disorder, other executive function difficulties, behavior and emotional disorders, autism spectrum disorder, intellectual disabilities, learning disabilities, dyslexia, language and communication difficulties, physical and sensory disabilities, and more. With the bulk of educational psychology focused on mainstream or typically developing learners, relatively little educational psychology theory, research, measurement, or practice has attended to students with special needs. As clearly demonstrated in this book, the factors and processes studied within educational psychology—motivation and engagement, cognition and neuroscience, social emotional development, instruction, home and school environments, and more—are vital to all learners, especially those at risk or disabled. Integrating guidance from the *DSM 5* by the American Psychiatric Association and the *International Classification of Diseases ICD 10* by the World Health Organization, this book synthesizes and builds on existing interdisciplinary research to establish a comprehensive case for effective psycho-educational theory, research, and practice that address learners with special needs. Twenty seven chapters by experts in the field are structured into three parts on diverse special needs categories, perspectives from major educational psychology theories and constructs relevant to special needs learning, development, and knowledge building.
