

▲ E-ACTIVE BODY CONTROL

Fully active suspension
with 48-volt wheel-individual force control

▲ E-ACTIVE BODY CONTROL extends the AIRMATIC with an active hydropneumatic system. The air spring carries the base load of the vehicle body and regulates the level. The damper has continuously variable damping valves (ADS+) and two hydraulic accumulators. Through the motor-pump-unit, the oil

can be shifted so that a pressure difference within the damper arises and thus an active force. E-ACTIVE BODY CONTROL is the only system on the market that regulates the spring and damper forces on each wheel individually.
