Biofeedback and Mindfulness in Everyday Life Inna Khazan, 2019-07-30 A mind body approach to taking control of your physical and emotional health. Biofeedback is the process of training your body to control its involuntary actions such as breathing and heart rate. Minor changes to these actions can significantly improve physical and emotional well being. In *Biofeedback and Mindfulness in Everyday Life* Harvard Medical School faculty member Inna Khazan pairs biofeedback techniques with mindfulness practice to address some of life's most common ailments from anxiety and fear to stress and insomnia. She begins with a description of basic physiological information explaining concepts such as breathing and overbreathing. In Part Two she dives into the practice of mindfulness. And in Part Three she zeroes in on applying this mind body approach to an array of common problems. Khazan's approach outlines simple solutions for readers who want to improve the way they respond to challenges. She guides them through increasing their resilience and emotional flexibility while empowering them to take back control of their overall health.

The Complete Guide to Functional Training Allan Collins, 2015-12-24 As well as being the concept in fitness and strength and conditioning, functional training is also probably the most poorly understood concept in fitness. Functional training is any exercise that improves your ability to perform tasks required in your day to day life, job or chosen sport so that each movement included as part of your

workout mimics a range of motion or engages muscles that are necessary to impact on performance whether it be on the rugby pitch or simply the ability to lift small children out of car seats Includes over 100 functional exercises and detailed pictures and descriptions of all the techniques show you clearly how to apply them into your training programme
