**Economics in the Long Run** Theodore Rosenof, 2000-11-09 Though understandably preoccupied with the immediate problems of the Great Depression the generation of economists that came to the forefront in the 1930s also looked ahead to the long term consequences of the crisis and proposed various solutions to prevent its recurrence Theodore Rosenof examines the long run theories and legacies of four of the leading members of this generation John Maynard Keynes of Great Britain who influenced the New Deal from afar Alvin Hansen and Gardiner Means who fought over the direction of New Deal policy and Joseph Schumpeter an opponent of the New Deal Rosenof explores the conflicts that arose among long run theorists arguing that such disputes served eventually to set the stage for the emergence and domination of a short run Keynesian approach to economic policy that collapsed under the impact of 1970s stagflation Tracing the subsequent revival of long run theories Rosenof demonstrates their relevance to an understanding of the economy's problems over the past quarter century and to the current debate over public policy Originally published in 1997 A UNC Press Enduring Edition UNC Press Enduring Editions use the latest in digital technology to make available again books from our distinguished backlist that were previously out of print These editions are published unaltered from the original and are presented in affordable paperback formats bringing readers both historical and cultural value The Final Act Michael Cotey Morgan, 2020-08-11 The definitive account of the historic diplomatic agreement that provided a blueprint for ending the Cold War The Helsinki Final Act was a watershed of the Cold War Signed by thirty five European and North American leaders at a summit in Finland in the summer of 1975 the document presented a vision for peace based on common principles and cooperation across the Iron Curtain The Final Act is the first in depth history of the diplomatic saga that produced this important agreement This gripping book explains the Final Act's emergence from the parallel crises of the Soviet bloc and the West during the 1960s and the conflicting strategies that animated the negotiations Drawing on research in eight countries and multiple languages The Final Act shows how Helsinki provided a blueprint for ending the Cold War and building a new international order The Correspondence of Alfred Marshall, Economist Alfred Marshall, Royal Economic Society (Great Britain), 1996-01-26 This is the second of a three volume work constituting a comprehensive scholarly edition of the correspondence of the English economist Alfred Marshall 1842-1924 one of the leading figures in the development of economics and the founder of the Cambridge School of Economics The edition fills a long standing gap in the history of economic thought with hitherto unpublished material Students will find it a basic resource for understanding the development of economics and other social sciences in the period since 1870 In particular it provides much new information about Marshall's views on economic social and political issues his struggles to promote the teaching of economics at the University of Cambridge and his relations with colleagues in Cambridge and elsewhere Marshall's letters are notable for their frankness and spontaneity The Man Who Knew Sebastian Mallaby, 2017-12-05 Exceptional Deeply researched and

elegantly written As a description of the politics and pressures under which modern independent central banking has to operate the book is incomparable Financial Times The definitive biography of the most important economic statesman of our time from the bestselling author of *The Power Law* and *More Money Than God* Sebastian Mallaby's magisterial biography of Alan Greenspan the product of over five years of research based on untrammelled access to his subject and his closest professional and personal intimates brings into vivid focus the mysterious point where the government and the economy meet To understand Greenspan's story is to see the economic and political landscape of our time and the presidency from Reagan to George W Bush in a whole new light As the most influential economic statesman of his age Greenspan spent a lifetime grappling with a momentous shift the transformation of finance from the fixed and regulated system of the post war era to the free for all of the past quarter century The story of Greenspan is also the story of the making of modern finance for good and for ill Greenspan's life is a quintessential American success story raised by a single mother in the Jewish migr community of Washington Heights he was a math prodigy who found a niche as a stats crunching consultant A master at explaining the economic weather to captains of industry he translated that skill into advising Richard Nixon in his 1968 campaign This led to a perch on the White House Council of Economic Advisers and then to a dazzling array of business and government roles from which the path to the Fed was relatively clear A fire breathing libertarian and disciple of Ayn Rand in his youth who once called the Fed's creation a historic mistake Mallaby shows how Greenspan reinvented himself as a pragmatist once in power In his analysis and in his core mission of keeping inflation in check he was a maestro indeed and hailed as such At his retirement in 2006 he was lauded as the age's necessary man the veritable God in the machine the global economy's avatar His memoirs sold for record sums to publishers around the world But then came 2008 Mallaby's story lands with both feet on the great crash which did so much to damage Alan Greenspan's reputation Mallaby argues that the conventional wisdom is off base Greenspan wasn't a naïve ideologue who believed greater regulation was unnecessary He had pressed for greater regulation of some key areas of finance over the years and had gotten nowhere To argue that he didn't know the risks in irrational markets is to miss the point He knew more than almost anyone the question is why he didn't act and whether anyone else could or would have A close reading of Greenspan's life provides fascinating answers to these questions answers whose lessons we would do well to heed Because perhaps Mallaby's greatest lesson is that economic statesmanship like political statesmanship is the art of the possible *The Man Who Knew* is a searching reckoning with what exactly comprised the art and the possible in the career of Alan Greenspan **The Official Index to The Times** ,1922
