The Cumulative Book Index , 1999 **Polymers in Medicine II** E. Chiellini, 2012-12-06 Polymers and polymer based composites have gained increasingly larger applications in medicine and surgery Presently most biomaterials applications rely on industrial substances that were initially developed by industry for non medical purposes Moreover polymers have been often used regardless of their peculiar characteristics which can be viceversa and very attractive for some specific applications In the past years we have assisted to a significative and faster development of polymer science as well as of medicine and surgery The assistance of computer aided apparatus the use of always more advanced instruments

the larger interest of the academic and industrial world bring continuously new contributions to the research on biomedical and pharmaceutical use of polymers. The need of a forum where these specific researches can be presented and discussed and the success of the 1st Conference on Polymers in Medicine held in Porto Cervo in 1982 have encouraged the Editors to plan a periodical meeting focused on polymers and composites to be held every odd year. This book contains papers selected by an International Scientific Committee among those presented at the 2nd International Conference on Polymers in Medicine Biomedical and Pharmaceutical Applications held in Capri Italy 3-7 June 1985. In addition to contributed papers several Authors were invited to present the state of the art as well as their personal contribution on specific key arguments. The level of all contributions was high, the participation well qualified and the meeting interesting and hopefully pleasant.

Medical Polymers, 2004. The fourth international conference focusing on polymers used in the medical industry. The use of polymers in medical technology continues to grow and provides major business opportunities for companies who service the medical industry. Medical Polymers 2004 brought together speakers and delegates from the whole medical device supply chain to identify and address the challenges facing our industry. The conference proceedings will appeal to anyone directly involved or associated with the medical device industry. They will be of particular value for businesses involved with design and manufacturing raw material supply, machine and equipment supply, processing and moulding. The papers presented provide an excellent overview of the current state and future potential of polymers used in the medical industry.
