## **Advanced High Dynamic Range Imaging Theory And Practice:**

Advanced High Dynamic Range Imaging Francesco Banterle, Alessandro Artusi, Kurt Debattista, Alan Chalmers, 2011-02-10 Imaging techniques seek to simulate the array of light that reaches our eyes to provide the illusion of sensing scenes directly Both photography and computer graphics deal with the generation of images Both disciplines have to cope with the high dynamic range in the energy of visible light that human eyes can sense Traditionally photography and computer graphics took different approaches to the high dynamic range problem Work over the last ten years though has unified these disciplines and created powerful new tools for the creation of complex compelling and realistic images This book provides a practical introduction to the emerging new discipline of high dynamic range imaging that combines photography and computer graphics By providing detailed equations and code the book gives the reader the tools needed to experiment with new techniques for creating compelling images A supplemental website contains downloads and additional information

**Advanced High Dynamic Range Imaging** Francesco Banterle, Alessandro Artusi, Kurt Debattista, Alan Chalmers, 2017-07-28 This book explores the methods needed for creating and manipulating HDR content HDR is a step change from traditional imaging more closely matching what we see with our eyes In the years since the first edition of this book appeared HDR has become much more widespread moving from a research concept to a standard imaging method This new edition incorporates all the many developments in HDR since the first edition and once again emphasizes practical tips including the authors popular HDR Toolbox available on the authors website for MATLAB and gives readers the tools they need to develop and experiment with new techniques for creating compelling HDR content Key Features Contains the HDR Toolbox for readers experimentation on authors website Offers an up to date detailed guide to the theory and practice of high dynamic range imaging Covers all aspects of the field from capture to display Provides benchmarks for evaluating HDR imagery Advanced High Dynamic Range Imaging ,2011 High Dynamic Range Video Alan Chalmers, Patrizio

Campisi, Peter Shirley, Igor García Olaizola, 2016-12-05 High Dynamic Range Video Concepts Technologies and Applications gives an introduction to a full range of topics within the end to end HDR video pipeline covering the issues around capturing HDR and stereo HDR video such as ghosting and use of legacy LDR systems how HDR video can be manipulated including real time mixing the very latest designs for HDR displays HDR video on mobile devices and the applications of HDR video With this book the reader will gain an overview of the current state of the art of HDR video learn the potential of HDR video to provide a step change to a wide range of imaging applications and attain the knowledge needed to introduce HDR video in their own applications Written by experts who have been actively researching High Dynamic Range Video Covers a full range of topics within the end to end HDR video pipeline Provides applications that demonstrate how HDR video can be applied

*High Dynamic Range Video* Frédéric Dufaux, Patrick Le Callet, Rafal Mantiuk, Marta Mrak, 2016-04-27 At the time of rapid technological progress and uptake of High Dynamic Range HDR video content in numerous sectors this book provides an

overview of the key supporting technologies discusses the effectiveness of various techniques reviews the initial standardization efforts and explores new research directions in all aspects involved in HDR video systems Topics addressed include content acquisition and production tone mapping and inverse tone mapping operators coding quality of experience and display technologies This book also explores a number of applications using HDR video technologies in the automotive industry medical imaging spacecraft imaging driving simulation and watermarking By covering general to advanced topics along with a broad and deep analysis this book is suitable for both the researcher new or familiar to the area With this book the reader will Gain a broad understanding of all the elements in the HDR video processing chain Learn the most recent results of ongoing research Understand the challenges and perspectives for HDR video technologies Covers a broad range of topics encompassing the whole processing chain in HDR video systems from acquisition to display Provides a comprehensive overview of this fast emerging topic Presents upcoming applications taking advantages of HDR

Third a machine learning method is proposed for the purpose of reconstructing an HDR image from one single exposure low dynamic range LDR image The method is trained on a large set of HDR images using recent advances in deep learning and the results increase the quality and performance significantly as compared to existing algorithms The areas for which contributions are presented can be closely inter linked in the HDR imaging pipeline Here the thesis work helps in promoting efficient and high quality HDR video distribution and display as well as robust HDR image reconstruction from a single conventional LDR image     Physics Briefs ,1994     **1995 IEEE Nuclear Science Symposium and Medical Imaging Conference Record** Patricia A.
