**Reading Beyond the Code** Terence Cave,Deirdre Wilson,2018-04-28

This book explores the value for literary studies of the model of communication known as relevance theory Drawing on a wide range of examples lyric poems by Yeats Herrick Heaney Dickinson and Mary Oliver novels by Cervantes Flaubert Mark Twain and Edith Wharton nine of the ten essays are written by literary specialists and use relevance theory both as a broad framing perspective and as a resource for detailed analysis The final essay by Deirdre Wilson co founder with Dan Sperber of relevance theory takes a retrospective view of the issues addressed by the volume and considers the implications of literary studies for cognitive approaches to communication Relevance theory described by Alastair Fowler as nothing less than the makings of a radically new theory of communication the first since Aristotle s offers a comprehensive pragmatics of language and communication grounded in

evidence about the ways humans think and behave While designed to capture the everyday murmur of conversation gossip peace making hate speech love speech body language and the chatter of the internet it covers the whole spectrum of human modes of communication including literature in the broadest sense as a characteristically human activity Reading Beyond the Code is unique in using relevance theory as a prime resource for literary study and it is also the first to claim that the model works best for literature when understood in the light of a broader cognitive approach focusing on a range of phenomena that support an embodied conception of cognition and language This broadened perspective serves to enhance the value for literary studies of the central claim of relevance theory that the code model is fundamentally inadequate to account for human communication and in particular for the modes of communication that are proper to literature
