

#### 2.7.4.8 Avoiding heating near the hydraulic pipeline

Heating near the hydraulic pipeline can generate flammable spray, which can result in serious burn to you and persons around.

Do not perform fusion welding, soft welding or torch welding near hydraulic pipelines or other flammable materials. When heat spreads beyond the direct combustion area, hydraulic pipeline can be cut at any time.

During the fusion welding or soft welding, a temporary fireproofing shield should be set to protect the hose or other materials.

Avoiding heating pipes or hose conveying flammable liquid:

- Do not perform welding or gas cutting on the pipe or hose conveying flammable liquid.
- Before welding or gas cutting, remove the flammable liquid thoroughly with nonflammable solvent.

#### 2.7.4.9 Evacuating from the machine

In case of fire, evacuate from the machine in the following methods.

- If time permits, put the gear selector to idle and press brake button to keep it in the "P" position.
- If time permits, use the fire extinguisher.
- And then, evacuate from the machine.
