*Advances in Ubiquitous Computing: Future Paradigms and Directions* Mostefaoui, Soraya Kouadri, Maamar, Zakaria, Giaglis, George M., 2008-02-28 This book investigates the technology of ubiquitous computing emerging applications and services and social issues vital for the successful deployment of a ubiquitous computing application. Providing high quality authoritative content on such topics as device design, wireless communication, location sensing, privacy concerns, attention focus, multi person interaction and direct interaction work patterns, it is a must have in library collections. Provided by publisher *GeoComputation* Robert J. Abrahart, Linda M. See, 2014-06-23 A revision of Openshaw and Abrahart's seminal work *GeoComputation* Second Edition retains influences of its originators while also providing updated state of the art information on changes in the computational environment. In keeping with the field's development this new edition takes a broader view and provides comprehensive coverage across the *Human Computer Interaction: Concepts, Methodologies, Tools, and Applications* Ang, Chee Siang, Zaphiris, Panayiotis, 2008-10-31 Penetrates the human computer interaction (HCI) field with breadth and depth of comprehensive research *Handbook of Research on Ambient Intelligence and Smart Environments* Nak-Young Chong, Fulvio Mastrogiovanni, 2010-08-01 This book covers the cutting edge aspects of AMI applications specifically those involving the effective design, realization and implementation of a comprehensive ambient intelligence in smart environments *Resource Management in Mobile Computing Environments* Constantinos X. Mavromoustakis, Evangelos Pallis, George Mastorakis, 2014-06-09 This book reports the latest advances on the design and development of mobile computing systems describing their applications in the context of modeling, analysis and efficient resource management. It explores the challenges on mobile computing and resource management paradigms including research efforts and approaches recently carried out in response to them to address future open ended issues. The book includes 26 rigorously refereed chapters written by leading international researchers providing the readers with technical and scientific information about various aspects of mobile computing from basic concepts to advanced findings reporting the state of the art on resource management in such environments. It is mainly intended as a reference guide for researchers and practitioners involved in the design, development and applications of mobile computing systems seeking solutions to related issues. It also represents a useful textbook for advanced undergraduate and graduate courses addressing special topics such as mobile and ad hoc wireless networks, peer to peer systems for mobile computing, novel resource management techniques in cognitive radio networks and power management in mobile computing systems *Abstracts of Public Administration, Development, and Environment*, 2008 *Human Computer Interaction*, 2009 This reference book penetrates the human computer interaction (HCI) field a wide variety of comprehensive research papers aimed at expanding the knowledge of HCI.
