Roszak,2007 **AED and CPR** Arizona. Department of Administration, Government University,2006 *Saving sudden cardiac arrest victims in the workplace* ,2003 Automatic External Defibrillator (AED) Guidelines for Schools Virginia. Department of Education,2008 **Investigation of Automated External Defibrillator (AED) and Cardiopulmonary Resuscitation (CPR) Experience and Knowledge at The Ohio State University** Bryan Patrick Hennessey,2012 Abstract Automated External Defibrillator AED and Cardiopulmonary Resuscitation CPR training has become increasingly more common among non medical individuals Past studies have shown the benefits of placing AEDs in public settings for use by non medical first responders and that AED CPR training of responders is an important factor in resuscitation of victims of cardiac arrest However potential users must be aware of AED locations and must be willing to use them and perform CPR There is currently no location listing of AEDs on the OSU main campus This naturally leads to questions about community

knowledge and awareness of AED locations on campus and willingness and knowledge about their use A web based questionnaire with two sets of questions was administered to a sample of faculty and staff and a sample of administrators from The Ohio State University The goal of the study was to determine if these members of the OSU community know where AEDs are located on campus and to what extent these members are ready or willing to use them Information about the current training and experience levels of faculty and staff and their interest in participating in AED CPR training as well as administrators experience with AEDs and CPR and their interest in purchasing an AED or providing training was collected through the questionnaire The questionnaire was answered by 32 staff members 55 faculty members and 42 administrators over a two week period The results from the questionnaire suggest that few faculty staff or administrators have knowledge about the presence of AEDs in or near their work locations on campus The results from the questionnaire showed that while about two thirds of respondents had been trained in CPR at some point in time few were current in their training 10 7 percent of those who were trained at some point Very few had received AED training at any point in time However there was a widespread interest in participating in training in use of AED and CPR 95 2 percent of all respondents Administrators were generally interested in purchasing an AED for their building 80 0 percent responded yes or maybe and providing training for employees 80 0 percent responded yes or maybe Currently there is no system in place for providing AEDs in public areas at The Ohio State University and it is unknown exactly how many AEDs are currently on campus However based on this sample there is interest in obtaining AEDs for buildings on main campus that are not part of the medical campus and interest in receiving training in the use of AEDs and performing CPR Many other college campuses are moving toward comprehensive AED and CPR plans as part of their emergency management programs Their experience and the interest on the part of administrators faculty and staff who participated in this study could support the development of an AED program at The Ohio State University
