Autism A Very Short Introduction:

Autism Uta Frith, 2008 Everyone has heard of autism but the disorder itself is little understood This very short introduction to the condition offers a clear statement on what is currently known about autism and Asperger syndrome

Autism Uta Frith, 2008 Genomics: A Very Short Introduction John M. Archibald, 2018-02-22 Genomics has transformed the biological sciences From epidemiology and medicine to evolution and forensics the ability to determine an organism's complete genetic makeup has changed the way science is done and the questions that can be asked of it Its most celebrated achievement was the Human Genome Project a technologically challenging endeavor that took thousands of scientists around the world 13 years and over 3 billion US dollars to complete In this Very Short Introduction John Archibald explores the science of genomics and its rapidly expanding toolbox Sequencing a human genome now takes only a few days and costs as little as 1 000 The genomes of simple bacteria and viruses can be sequenced in a matter of hours on a device that fits in the palm of your hand The resulting sequences can be used to better understand our biology in health and disease and to personalize medicine Archibald shows how the field of genomics is on the cusp of another quantum leap the implications for science and society are profound ABOUT THE SERIES The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area These pocket sized books are the perfect way to get ahead in a new subject quickly Our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable Contemporary Philosophy of Autism Jami L. Anderson, Simon Cushing, 2025-08-25 This volume explores interesting and emerging philosophical questions related to autism It sheds light on the ways in which cultural attitudes about autism have changed in the decade since the editors published their first volume on the philosophy of autism So much about autism has changed in the last decade Cultural attitudes about autism are far more nuanced Self identification as autistic has exploded as have discussions of the political and social implications for being an out autistic person This volume approaches a wide range of issues that autism raises in social and political theory ethics philosophy of social science epistemology metaphysics and law The issues addressed include moral responsibility autism and gender knowledge acquisition the double empathy problem social cognition vulnerability in interpersonal communication masking the neurodiversity movement and destigmatization and the effectiveness of ABA therapy Each of the contributors many of whom self identify as autistic has a personal connection with autism Contemporary Philosophy of Autism will appeal to researchers and graduate students working in philosophy of mind philosophy of cognitive science epistemology philosophy of medicine and disability studies It will appeal to those working in other academic fields such as developmental psychology neuropsychology cognitive psychology and education Rainbow Dreams: 35 Years Of Empowering Children With Autism And Other Developmental Challenges Kenneth K Poon, Sze Wee Tan, Faridah Ali Chang, Manoj Pathnapuram, Kenneth Lyen, 2022-11-15 This book discusses the management of individuals on the autistic

spectrum as well as other developmental challenges It provides an excellent resource guide for parents caregivers educators healthcare workers psychologists and everyone involved in the care of differently abled and autistic persons The approach is practical and the aim is to try to gain deeper understanding into these conditions Based on the experience of the staff and parents of the Rainbow Centre the management is a person centred multidisciplinary and quality of life focused approach to helping these persons The book also covers the history and future directions across one s lifespan in the care of these individuals

Mind Matters In Children Kenneth Lyen,2022-10-25 Our mind is one of the most extraordinary wonders of mankind We use it to think critically and creatively it stores our treasured memories it helps us make friends and look after our loved ones and it can transform our impossible dreams into reality Sometimes we encounter glitches in our life s journey The brain may not advance as fast as expected This book delves into both the normal as well as the abnormal functioning of a child s mind Topics covered include intelligence creativity consciousness memory and normal development It also gives practical advice on how to manage children s mental health and problems like ADHD dyslexia autism and depression The book is timely because of the recent surge in interest of the human mind during the Covid 19 pandemic where there has been a dramatic worldwide increase in mental problems brought about by isolation economic slowdown unemployment and loss of our loved ones This book is suitable for everyone who is fascinated by the human mind

Modern Japan: A Very Short Introduction Christopher Goto-Jones,2009-04-23 Japan remains something of an enigma to many a confusing montage of the alien and the familiar This Very Short Introduction explodes the myths and explores the reality of modern Japan offering a concise engaging and accessible look at the history economy politics and culture of this fascinating nation It examines what the term modern means to the Japanese debunks the notion that Japan went through a period of total isolation from the world and explores the continuity between pre and post war Japan

Critical Neurodiversity Studies Jenny Bergenmar,Louise Creechan,Anna Stenning,2025-07-10 This landmark volume for neurodiversity studies introduces a new more inclusive field of scholarship for literary and cultural studies Bringing together scholars and writers from across Europe it explores the revolutionary potential of neurodivergent scholarly practice and demonstrates that there is no such thing as a normal response to cultural production Drawing on critical disability studies to highlight the ideology behind dominant notions of ability it moves beyond representations of neurodivergent characters and highlights the entanglement of sensory and cognitive difference with both cultural practices and social status Combining the recent turn towards psychiatric depathologisation with insights from feminist queer intersectional and critical race theory this volume aims to amplify the epistemic authority of those who have been subject to marginalisation because of the ways we are taught to read and value literary culture In essence this volume reveals what it means to read write and love literature and the arts as a neurodivergent person

Psychology and Education Diahann Gallard,Katherine M. Cartmell,2014-11-20 There are a number of psychological themes which are key to really understanding education for example the internal processes of

learners the nature of learning in culture and the influences on teaching and learning Written specifically for education studies students Psychology and Education is an accessible text that offers a clear introduction to educational psychology on education studies programmes It considers the key psychological ideas that will support students understanding of how different individuals and groups of individuals learn and behave in educational contexts and settings Looking at factors that influence learning and attainment the book discusses themes such as the relationship between cognition and emotion emotional intelligence and motivation Throughout the emphasis is on encouraging the reader to avoid stereotyping attributions and rigid views of learner ability Features include a focus on only the most relevant psychological themes case studies to exemplify key points extended research tasks reflection points Part of the Foundations of Education Studies series this timely textbook is essential reading for students coming to the study of educational psychology for the first time It will ensure that undergraduate students are confident and competent with core psychological ideas related to education and help them to understand how different individuals learn and behave in educational contexts and settings **Talking Book**
