[2] Phillip Areeda, 1991 *Antitrust Analysis* Phillip Areeda, 1978 *Antitrust Analysis* Phillip Areeda, 1970 **Cases and Materials on Modern Antitrust Law and Its Origins** THOMAS D.. JR. MORGAN (RICHARD J. PIERCE.), Richard Pierce Jr., 2023-02-03 This text organizes cases over four periods a 25 year period from 1890 to 1914 in which most of today's issues were foreshadowed a 25 year period from 1915 to 1939 in which the rule of reason forced courts to investigate the actual consequences of business practices a 35 year period from 1940 to 1975 in which the per se rule and industry concentration provided the predominant models for analysis and the modern period of over 40 years which is a synthesis of the second and third periods The new Seventh Edition describes the many major changes in antitrust law and policy that the present leaders of the FTC and the Antitrust Division at the Department of Justice

are attempting to make and includes questions after many of the modern cases that require students to evaluate those proposed changes The historical approach the authors take will be particularly helpful to students because the new leadership is urging a return to the approach to antitrust law that the Supreme Court embraced before 1974 The book includes all of the major cases that illustrate that approach The new edition includes all of the important recent court opinions including the Supreme Court's opinions in *Ohio v American Express* and *NCAA v Alston* and the D C Circuit's opinion in *U S v AT T* [Antitrust Analysis](#) Phillip E. Areeda, 1981 *United States Antitrust Law and Economics* Einer Elhauge, 2008 This casebook presents a modern approach to understanding U S antitrust law illuminating the economic analysis that dominates modern antitrust analysis in a straightforward way that minimizes technical jargon and makes the underlying economic concepts accessible to a broad audience The cases are carefully edited to present the facts and issues clearly and succinctly with the focus on extensive questions that probe those issues and show how to apply modern antitrust economic analysis to them The result is a book that is quite compact fewer than 800 pages but covers the full waterfront of antitrust issues and generates plenty of multi layered points and ideas to fill a class All the recent Supreme Court antitrust cases are fully incorporated into the structure of the book as are all the relevant agency guidelines The merger section focuses on modern agency practices and merger theories and selected cases that illustrate them rather than on outdated Supreme Court cases that no longer describe current merger enforcement *Antitrust Law, Policy, and Procedure* E. Thomas Sullivan, Herbert Hovenkamp, Howard A. Shelanski, Christopher R. Leslie, 2014 To view or download the 2018 Supplement to this book [click here](#) This innovative and popular casebook focuses on teaching antitrust through the best legal precedents available It emphasizes current judicial opinions and includes dissents where relevant to help students grasp the issues The notes reflect a balanced approach to the competing ideologies of left right and center confronting their defects and presenting their strengths Professors who are strongly committed to a particular ideology should find plenty of material to criticize or alternatively to illustrate their view The Seventh Edition is a substantial revision from the previous edition with updating of all case law materials including the recent decisions of the Supreme Court as well as numerous lower court decisions The Seventh Edition includes coverage regarding Chapter Two Updated economic analysis including several new graphs Chapter Three Revised and Updated discussions of transnational application of U S antitrust laws modifications to injunctive relief as antitrust remedy new interpretation of alien venue statute and worldwide service of process new discussion of meaning of consumer welfare or total welfare as a focus of antitrust concerns updated discussions of standing damages and other remedies and updated treatment of antitrust class actions Chapter Four New discussion of Most Favored Nation MFN clauses updated cases and discussion on the standards for motions to dismiss and motions for summary judgment in antitrust cases and a new section on agreements involving intellectual property including the Supreme Court's *Actavis* opinion Chapter Five Completely updated discussion of both inter and intra brand vertical restraints new tying cases

with a focus on tying in high technology markets and use of discounting practices whose operation is similar to exclusive dealing Chapter Six Expanded discussion of discount pricing and updated and expanded treatment of attempted monopolization Chapter Seven Updated discussion of 2010 Merger Guidelines as well as Revised Guidelines on Merger Remedies and complete coverage of merger cases through 2013 Chapter Eight Discussion on the Robinson Patman Act has been updated but placed into an open access digital file so that those who wish to teach it may download it this saves space and cost in the print version of the casebook Chapter Nine Updated discussion of state action doctrine including Supreme Court s Phoebe Putney decision plus important Circuit Court decisions and updated discussion of role of antitrust in regulated industries particularly telecommunications This book also is available in a three hole punched alternative loose leaf version printed on 8 5 x 11 inch paper with wider margins and with the same pagination as the hardbound book
