Selected Contemporary Challenges of Ageing Policy Łukasz Tomczyk, Andrzej Klimczuk, 2017-11-23

This volume Selected Contemporary Challenges of Aging Policy is the most international of all published monographs from the series Czech Polish Slovak Studies in Andragogy and Social Gerontology. Among the scholars trying to grasp the nuances and trends of social policy there are diverse perspectives resulting not only from the extensive knowledge of the authors on the systematic approach to the issue of supporting older people but also from the grounds of the represented social gerontology schools. In the texts of Volume VII interesting are both distinct and coherent elements presenting the role of local, regional and global policies in the prism of the countries from which the authors originate: the Czech Republic, Slovenia, Lithuania, Latvia, Poland, Slovakia, Italy, Turkey and the United States. The chapters show a wealth of methodological approaches to the perception of social policy and its tools. In the texts there are issues related to the idea of active ageing, discrimination against older people in the workplace, comparability of solutions friendly to employment of older adults in the Czech Republic, Poland and Slovakia as well as focused on the importance of educational forms: universities, of the third age, senior clubs, folk high schools and other non formal solutions determining an active life in old age. This monograph also attempted to answer the question regarding how to transfer the idea of intergenerational learning into the realm of practice. This issue complements the chapter on the implementation of intergenerational programs in institutions providing long term care support. The book also outlines a public policy on ageing in the perspective of the changes over the last few decades: Slovenia and the case demonstrating solutions to accelerate self-reliance as a key to active ageing, Turkey. We hope that seventh volume of our series will be an intellectual stimulus for further international research on change in social policy and will contribute to the dissemination of best practices as well as contribute to positive social change.

The Making of Ageing Policy Rune Ervik, Tord Skogedal Lindén, 2013-01-01

This innovative book provides insightful analyses and critique of policy ideas and practices regarding the challenges and opportunities facing ageing European societies. Through pertinent case study examples it elucidates the ideological and institutional factors that underlie policy responses in different European societies. It demonstrates the pivotal role of ideas and of international organisations in shaping the policy and practice landscape and driving through key policy reforms in Europe. This edited book provides an invaluable resource for policy makers, researchers and scholars interested in ageing policy and the political process. Sara Arber, University of Surrey, UK. Demographic changes transform societies and challenge existing institutional solutions and policies. The need for policies addressing these challenges has increasingly been put on the agenda. The Making of Ageing Policy analyzes these innovative policy ideas and practices at both the international and the national level. The book provides insights into the value basis and justifications of ageing policies, the potential for conflict and how policy ideas are embedded in institutional defense and advocacy for institutional change and reform. In terms of policy ideas the economically focused productive ageing dominates but the book finds instances where the broader active ageing approach has gained a hold in policymaking. Ageing policy reforms within

pensions and labour market policy include measures to make people extend their working life. In long term care reforms abound and implies changes in the responsibility of financing and provision but the patterns across countries differ substantially. The authors provide normative analysis of ageing policy ideas, divulge political conflicts and consensus on ageing policy and contribute by describing and analyzing the changing institutional landscape of ageing politics and policies throughout Europe. It will prove insightful for academics and researchers in the field but it will also appeal to practitioners who are increasingly dealing with demographic challenges across a wide number of policy sectors in their daily affairs.

Active ageing and solidarity between generations in Europe Axel Börsch-Supan, Martina Brandt, Howard Litwin, Guglielmo Weber, 2013-06-25. SHARE is an international survey designed to answer the societal challenges that face us due to rapid population ageing. How do Europeans age? Under which circumstances do older people and their families live how healthy and active are they and how did the crisis affect them? The authors of this multidisciplinary book have taken a first step toward answering these questions based on the recent SHARE data including a new social networks module. **Active Ageing in Europe** Dragana Avramov, 2003
