Proceedings of the 14th International Scientific Conference: Computer Aided Engineering Eugeniusz Rusiński, Damian Pietrusiak, 2019-03-09 This book presents the proceedings of the 14th International Conference on Computer Aided Engineering collecting the best papers from the event which was held in Wrocław Poland in June 2018 It includes contributions from researchers in computer engineering addressing the applied science and development of the industry and offering up to date information on the development of the key technologies in technology transfer It is divided into the following thematic sections parametric and concurrent design advanced numerical simulations of physical systems integration of CAD CAE systems for machine design presentation of professional CAD and CAE systems presentation of the modern methods of machine testing presentation of practical CAD CAM CAE applications designing and manufacturing of machines and technical systems durability prediction repairs and retrofitting of power equipment strength and thermodynamic analyses of power equipment design and calculation of various types of load carrying structures numerical methods of dimensioning materials handling and long distance transport equipment cranes gantries automotive rail air space and other special vehicles and earth moving machinery CAE integration problems The conference and its proceedings offer a major interdisciplinary forum for researchers and engineers in innovative studies and advances in this dynamic field

Advances in Hydraulic and Pneumatic Drives and Control, Centrifugal Pumps, Valves, and Seals 2025 Jarosław Stryczek, Urszula Warzyńska, Michał Banaś, 2025-10-17 This book reports on cutting edge research and technical achievements in the field of hydraulic drives The chapters selected from contributions presented at the 21st International Scientific Technical Conference on Hydraulic and Pneumatic Drives and Control Centrifugal Pumps Valves and Seals NSHP 2025 held on October 8 10 2025 in Karpacz Poland cover a wide range of topics such as theoretical advances in hydraulics pneumatics and control fluid dynamics diagnostics and simulation and energy aspects and applications Further topics include design and performance aspects of pumps and rotary systems sealing elements and connections and new materials and their properties in improving the efficiency of hydraulic components

Advances in Heat Transfer and Fluid Dynamics Mohammad Altamush Siddiqui, Nadeem Hasan, Andallib Tariq, 2024-02-23 This book comprises select proceedings of the 1st International Conference on Heat Transfer and Fluid Dynamics AHTFD 22 It covers latest research trends and development in diverse areas like aerodynamics complex fluid phenomenon turbulence flow control thermal management green buildings micro scale transport phenomena in biological systems renewable energy power generation combustion and related applications in heat transfer and fluid dynamics among others The book is a valuable resource for researchers and professionals working in the various areas of mechanical engineering

Discrete Element Method for Multiphase Flows with Biogenic Particles Ling Zhou, Mahmoud A. Elemam, Ramesh K. Agarwal, Weidong Shi, 2024-09-24 This book presents the advanced theory and application of the combined Computational Fluid Dynamics Discrete Element Method CFD DEM to

multiphase flow simulations of the gas and bio particulate matter of non uniformly shaped biomass It explores how DEM can simulate the complex behaviour of biomass particles such as their packing in the multiphase flows that occurs in the agricultural product processing industries It offers an overview of aerodynamic systems such as cyclone separators used in the agricultural processing industry A detailed description of DEM modeling including the particle particle particle boundary and particle fluid interactions in the context of biomass particles of varying sizes and shapes is provided Coverage includes the critical application of CFD DEM simulation technology in designing and optimizing grain handling and processing equipment and the application of extended DEM to other granular flows of complex particles like sand powders and dust from mines where clumping and agglomeration occur The application of DEM in modeling and simulation of complex multiphase systems can help improve productivity reduce costs and increase efficiency in the agricultural industry

Automotive Painting Technology Kimio Toda, Abraham Salazar, Kozo Saito, 2012-12-21 This book offers unique and valuable contributions to the field It offers breadth and inclusiveness Most existing works on automotive painting cover only a single aspect of this complex topic such as the chemistry of paint or paint booth technology Monozukuri and Hitozukuri are Japanese terms that can be translated as making things and developing people but their implications in Japanese are richer and more complex than this minimal translation would indicate The Monozukuri Hitozukuri perspective is drawn from essential principles on which the Toyota approach to problem solving and continuous improvement is based From this perspective neither painting technology R D nor painting technology use in manufacturing can be done successfully without integrating technological and human concerns involved with making and learning in the broadest sense as the hyphen is meant to indicate The editors provide case studies and examples drawn from Mr Toda s 33 years of experience with automotive painting at Toyota and from Dr Saito s 18 years experience with IR4TD the research for development group he leads at the University of Kentucky that give details on how these two principles can be integrated for successful problem solving and innovation in industry in university R D and in the collaboration between the two The book will bring readers up to date on progress in the field over the last decade to provide a basis for and to indicate fruitful directions in future R D and technology innovation for automotive painting
