**Affective Computing** Rosalind W. Picard, 2000-07-24 According to Rosalind Picard if we want computers to be genuinely intelligent and to interact naturally with us we must give computers the ability to recognize understand even to have and express emotions The latest scientific findings indicate that emotions play an essential role in decision making perception learning and more that is they influence the very mechanisms of rational thinking Not only too much but too little emotion can impair decision making According to Rosalind Picard if we want computers to be genuinely intelligent and to interact naturally with us we must give computers the ability to recognize understand even to have and express emotions Part 1 of this book provides the intellectual framework for affective computing It includes background on human emotions requirements for emotionally intelligent computers applications of affective computing and moral and social questions raised by the technology Part 2 discusses the design and construction of affective computers Although this material is more technical than that in Part 1 the author has kept it less technical than typical scientific publications in order to make it accessible to newcomers Topics in Part 2 include signal based representations of emotions human affect recognition as a pattern recognition and learning problem recent and ongoing efforts to build models of emotion for synthesizing emotions in computers and the new application area of affective wearable computers **Applied Affective Computing** Leimin

**Emotion in Human-Computer Interaction** Christian Peter, Russell Beale, 2009-08-29 Affect and emotion play an important role in our everyday lives. They are present whatever we do, wherever we are, and wherever we go without us being aware of them for much of the time. When it comes to interaction, be it with humans, technology, or humans via technology, we suddenly become more aware of emotion, either by seeing the other's emotional expression or by not getting an emotional response while anticipating one. Given this, it seems only sensible to explore affect and emotion in human-computer interaction to investigate the underlying principles, to study the role they play, to develop methods to quantify them, and to finally build applications that make use of them. This is the research field for which, over ten years ago, Rosalind Picard coined the phrase affective computing. The present book provides an account of the latest work on a variety of aspects related to affect and emotion in human-technology interaction. It covers theoretical issues, user experience, and design aspects, as well as sensing issues and reports on a number of affective applications that have been developed in recent years. Multimodal Affective Computing: Affective Information Representation, Modelling, and Analysis Gyanendra K. Verma, 2023-03-21 Affective computing is an emerging field situated at the intersection of artificial intelligence and behavioral science. Affective computing refers to studying and developing systems that recognize, interpret, process, and simulate human emotions. It has recently seen significant advances from exploratory studies to real-world applications. Multimodal Affective Computing offers readers a concise overview of the state of the art and emerging themes in affective computing, including a comprehensive review of the existing approaches in applied affective computing systems and social signal processing. It covers affective facial expression and recognition, affective body expression and recognition, affective speech processing, affective text and dialogue processing, recognizing affect using physiological measures, computational models of emotion, and theoretical foundations and affective sound and music processing. This book identifies future directions for the field and summarizes a set of guidelines for developing next-generation affective computing systems that are effective, safe, and human-centered. The book is an informative resource for academicians, professionals, researchers, and students at engineering and medical institutions working in the areas of applied affective computing, sentiment analysis, and emotion recognition. **Affective Computing and Intelligent Interaction** Sidney D'Mello, Arthur Graesser, Bjoern Schuller, Jean-Claude Martin, 2011-10-18 The two-volume set LNCS 6974 and LNCS 6975 constitutes the refereed proceedings of the Fourth International Conference on Affective Computing and Intelligent Interaction (ACII 2011) held in Memphis, TN, USA, in October 2011. The 135 papers in this two-volume set, presented together with 3 invited talks, were carefully reviewed and selected from 196 submissions. The papers are organized in topical sections on recognition and synthesis of human affect, affect-sensitive applications, methodological issues in affective computing, affective and social robotics, affective and behavioral interfaces, relevant insights from psychology, affective databases, evaluation and annotation tools. Affective Computing and Intelligent Interaction Jia Luo, 2012-01-25 2012 International Conference on Affective Computing and Intelligent Interaction (ICACII

2012 was the most comprehensive conference focused on the various aspects of advances in Affective Computing and Intelligent Interaction. The conference provided a rare opportunity to bring together worldwide academic researchers and practitioners for exchanging the latest developments and applications in this field such as Intelligent Computing, Affective Computing, Machine Learning, Business Intelligence, and HCI. This volume is a collection of 119 papers selected from 410 submissions from universities and industries all over the world based on their quality and relevancy to the conference. All of the papers have been peer reviewed by selected experts.

**Affective Computing and Intelligent Interaction** Ana Paiva, 2007-08-30. This book constitutes the refereed proceedings of the Second International Conference on Affective Computing and Intelligent Interaction ACII 2007 held in Lisbon, Portugal in September 2007. The 57 revised full papers and 4 revised short papers presented together with the extended abstracts of 33 poster papers were carefully reviewed and selected from 151 submissions. The papers are organized in topical sections on affective facial expression and recognition, affective body expression and recognition, affective speech processing, affective text and dialogue processing, recognising affect using physiological measures, computational models of emotion and theoretical foundations, affective databases, annotations, tools and languages, affective sound and music processing, affective interactions, systems and applications, as well as evaluating affective systems.

**Emotions and Affect in Human Factors and Human-Computer Interaction** Myoungsoon Jeon, 2017-04-05. Emotions and Affect in Human Factors and Human Computer Interaction is a complete guide for conducting affect related research and design projects in H F and HCI domains. Introducing necessary concepts, methods, approaches, and applications, the book highlights how critical emotions and affect are to everyday life and interaction with cognitive artifacts. The text covers the basis of neural mechanisms of affective phenomena as well as representative approaches to Affective Computing, Kansei Engineering, Hedonomics, and Emotional Design. The methodologies section includes affect induction techniques, measurement techniques, detection and recognition techniques, and regulation models and strategies. The application chapters discuss various H F and HCI domains: product design, human robot interaction, behavioral health, and game design. Engineers and designers can learn and apply psychological theories and mechanisms to account for their affect related research and can develop their own domain specific theory. The approach outlined in this handbook works to close the existing gap between the traditional affect research and the emerging field of affective design and affective computing. Provides a theoretical background of affective sciences. Demonstrates diverse affect induction methods in actual research settings. Describes sensing technologies such as brain computer interfaces, facial expression detection, and more. Covers emotion modeling and its application to regulation processes. Includes case studies and applied examples in a variety of H F and HCI application areas. Addresses emerging interdisciplinary areas including Positive Technology, Subliminal Perception, Physiological Computing, and Aesthetic Computing.
