**U.S. Security Cooperation with Africa** Robert J. Griffiths, 2016-04-14 As Africa's strategic importance has increased over the past decade and a half United States security cooperation with the continent has expanded The most visible dimension of this increased engagement was the establishment of the U.S. Military Command for Africa AFRICOM Some critics are skeptical of AFRICOM's purpose and see the militarization of U.S. Africa policy while others question its effectiveness Recognizing the link between development and security AFRICOM represents a departure from the traditional

organization of military commands because of its holistic approach and the involvement of the Department of State as well as other U S government stakeholders Nevertheless AFRICOM s effort to combine security and development faces formidable conceptual and operational challenges in trying to ensure both American and African security interests The human security perspective s emphasis on issues that go beyond traditional state centered security to include protecting individuals from threats of hunger disease crime environmental degradation and political repression as well as focusing on social and economic justice is an important component of security policy At the same time the threat of violent extremism heavily influences U S security cooperation with Africa In this examination of the context of U S African security relations Robert J Griffiths outlines the nature of the African state traces the contours of African conflict surveys the post independence history of U S involvement on the continent and discusses policy organization and implementation and the impact of U S experiences in Iraq and Afghanistan on the U S Africa security relationship Africa s continuing geostrategic significance the influence of China and other emerging markets in the region and America s other global engagements especially in light of U S fiscal realities demonstrate the complexity of U S African security cooperation Rethinking Climate Change, Security and Politics Steven Ratuva,Mercedes Alda-Fernández,Dalila Gharbaoui,Masaki Kataoka,2025-09-19 The book provides a critical analysis of the nexus between climate change security and politics especially in relation to the role and impact of societal agencies such as states corporations military financial institutions and community organizations in framing and responding to climate change using various forms of social economic or political leverage Climate change is a major existential security threat to the planet and humanity yet there is continuing debate as to how it should be approached Choice ,2009
