After Poststructuralism Reading Stories Theory:

After Poststructuralism Colin Davis,2004 In the last decades of the twentieth century French poststructuralist theory transformed the humanities it also met with resistance and today we frequently hear that theory is dead In this brilliantly argued volume Colin Davis reconsiders key arguments for and against theory identifying significant misreadings reassesses the contribution of poststructuralist thought to the critical issues of knowledge ethics hope and identity sheds new light on the work of Jean Fran ois Lyotard Emmanuel Levinas Louis Althusser and Julia Kristeva in a stunning series of readings offers a fresh perspective on recent debates around the death of theory In closing he argues that theory may change but it will not go away After poststructuralism then comes the afterlife of poststructuralism Wonderfully accessible this is an account of the past and present fortunes of theory suitable for anyone researching teaching or studying in the field And yet it is much more than this Colin Davis provides a way forward for the humanities a way forward in which theory will play a crucial part

Montaigne after Theory, Theory after Montaigne Zahi Zalloua,2011-07-01 Essayist Michel de Montaigne is one of the most accessible and widely read authors in world literature His skepticism and relativism and the personal quality of his writing make him a perennial favorite among readers today Montaigne After Theory Theory After Montaigne pursues the idea that theory has altered the scholarly understanding of Montaigne while Montaigne s ideas have simultaneously challenged the authority of the various interpretive doxa collectively known as theory Montaigne s life and writings have drawn myriad interpretations While some scholars of his work focus on the content of the writings to define the man others stress his playful use of language Montaigne s complex and multifaceted works provide fertile ground for exploring themes of wide ranging significance within the field of literary theory including the relationship between biography and theory the critique of modernism a critical history of the confessional mode of writing sexuality and gender and the theory of practice The essays in this collection move beyond the current stalemate in Montaigne criticism by revisiting questions about the role of theory in literary studies and by opening up a dialogue on the validity and limitations or use and abuse of theory in Montaigne studies

The Novel After Theory Judith Ryan,2014-01-01 Novels began to incorporate literary theory in unexpected ways in the late twentieth century Through allusion parody or implicit critique theory formed an additional strand in fiction that raised questions about the nature of authorship and the practice of writing Studying this phenomenon provides fresh insight into the recent development of the novel and the persistence of modern theory beyond the period of its greatest success In this book Judith Ryan opens these questions to a range of readers drawing them into debates over the value of theory Ryan investigates what prompted fiction writers to incorporate and respond to theory nearly thirty years ago Designed for readers unfamiliar with the complexities of theory Ryan s book introduces the discipline s major trends and controversies and notes the salient ideas of a carefully selected set of individual thinkers Ryan follows novelists adaptation to and engagement with arguments drawn from theory as they translate abstract ideas into language structure and fictional strategy At the core of

her book is a fascinating microstudy of French poststructuralism in its dialogue with narrative fiction. Investigating theories of textuality, psychology and society in the work of Don DeLillo, Thomas Pynchon, J M Coetzee, Margaret Atwood, W G Sebald and Umberto Eco as well as Monika Maron, Alain Robbe Grillet, Marguerite Duras, Marilynne Robinson, David Foster Wallace and Christa Wolf, Ryan identifies subtle negotiations between author and theory and the richness this dynamic adds to texts. Resetting the way we think and learn about literature, her book reads current literary theory while uniquely tracing its shaping of a genre.

After Poststructuralism Colin Davis, 2004-03-01 In the last decades of the twentieth century French poststructuralist theory transformed the humanities; it also met with resistance and today we frequently hear that theory is dead. In this brilliantly argued volume, Colin Davis reconsiders key arguments for and against theory, identifying significant misreadings, reassesses the contribution of poststructuralist thought to the critical issues of knowledge, ethics, hope and identity, and sheds new light on the work of Jean-François Lyotard, Emmanuel Levinas, Louis Althusser and Julia Kristeva. In a stunning series of readings, offers a fresh perspective on recent debates around the death of theory. In closing, he argues that theory may change but it will not go away. After poststructuralism then comes the afterlife of poststructuralism. Wonderfully accessible, this is an account of the past and present fortunes of theory suitable for anyone researching, teaching or studying in the field. And yet it is much more than this: Colin Davis provides a way forward for the humanities, a way forward in which theory will play a crucial part.

Mindful Aesthetics Chris Danta, Helen Groth, 2013-11-07 In the last few decades, literary critics have increasingly drawn insights from cognitive neuroscience to deepen and clarify our understanding of literary representations of mind. This cognitive turn has been equally generative and contentious. While cognitive literary studies has reinforced how central the concept of mind is to aesthetic practice from the classical period to the present, critics have questioned its literalism and selective borrowing of scientific authority. Mindful Aesthetics presents both these perspectives as part of a broader consideration of the ongoing and vital importance of shifting concepts of mind to both literary and critical practice. This collection contributes to the forging of a new interdisciplinarity to paraphrase Alan Richardson's recent preface to the *Neural Sublime* that is more concerned with addressing how rather than why we should navigate the increasingly narrow gap between the humanities and the sciences.

The Bible in Theory Stephen D. Moore, 2010 The sixteen essays assembled in this volume, four of them co-authored, chart the successive phases of a professional life lived in the interstices of Bible and theory. Engaging such texts as the Song of Songs, 4 Maccabees, Mark, Luke, Acts, John and Romans, and such themes as the quest for the historical Jesus, the essays simultaneously traverse postmodernism, deconstruction, New Historicism, autobiographical criticism, cultural studies, postcolonial studies, masculinity studies, queer theory and posttheory. Individual essay introductions and periodic annotated bibliographies make the volume an advanced introduction to biblical literary criticism. From publisher's description.

After Poststructuralism Nancy Easterlin, Barbara Riebling, 1993 After Poststructuralism: Interdisciplinary and Literary Theory challenges the premises of and suggests new alternatives to the more

extreme approaches in current literary theory. The essays collected here examine the trend of theorizing in interdisciplinary studies from the perspective of more rigorous research methodologies with the aim of establishing the validity of interdisciplinary literary studies and broadening the field of inquiry. The collection is divided into three groups. The first examines the question of what interdisciplinarity has meant in literary studies in the last twenty years, the reasons for its ascension as a trend and the inherent theoretical flaws in certain poststructuralist positions. The second explores the relationship of theory and practice while the third group looks ahead to the rich possibilities for thinking and working in practical new directions. Postmodern Studies, 2008. *The Oxford Handbook of Film and Media Studies* Robert

Kolker, 2008-09-11. This handbook examines film and new media in the light of their convergence. It draws on leading scholars in the field to discuss traditional areas of history and theory of film and digital media. Its focus however is on the cycle of technologically driven arts. Film was born of a number of experiments in reproducing motion, all of which culminated in the nineteenth century projection of short films. The creation of digital media resulted from experiments in alternative forms of representation in the early 1960s. John Whitney began creating avant garde films from digital graphics around 1960 and some of his ideas and methods were incorporated by Stanley Kubrick in 2001 *A Space Odyssey*. By the early 1990s commercial filmmakers began to employ digital effects in their work. By the late nineties digital arts had come fully into their own both in the form of stand alone or interactive artworks and films created with and for the computer. At the same time digital effects had completely overtaken optical printing and matte painting in film. From special effects to creating realistic backgrounds and crowds the digital is infiltrating all aspects of filmmaking. The infiltration is about to become a takeover as celluloid is replaced by high definition digital recording and projection processes. Many aspects of film will change as this latest convergence takes place. Already cultural response to film has changed as viewers begin to teach themselves about film through supplementary material on DVDs and to make their own films on home computers. But this handbook is not a technical history or manual. Quite the contrary it is a scholarly work discussing the aesthetics, economics and cultural results of these changes and convergences. The book balances traditional scholarship and analysis with essays addressing technological change and the concurrent changes in cultural responses to these changes. Responses already acknowledged by the profession. Perspectives on Nursing Theory Pamela G. Reed, Nelma B. Crawford Shearer, 2009. This book is an anthology of classic and contemporary nursing articles that address various theoretical and philosophical perspectives on the nature of theory and knowledge development. It is designed to provide a comprehensive overview of the important discussions taking place regarding the structures and processes of knowledge building in nursing.

Literature, Science, and a New Humanities Jonathan Gottschall, 2008-09-15. Literature, Science and a New Humanities challenges dominant modes of literary analysis and sketches outlines of a new paradigm theory, method and ethos inspired by scientific models.
