Against Extinction The Story Of Conservation:

Against Extinction William Mark Adams, 2013 Conservation in the 21st century needs to be different and this book is a good indicator of why Bulletin of British Ecological Society Against Extinction tells the history of wildlife conservation from its roots in the 19th century through the foundation of the Society for the Preservation of the Wild Fauna of the Empire in London in 1903 to the huge and diverse international movement of the present day It vividly portrays conservation's legacy of big game hunting the battles for the establishment of national parks the global importance of species conservation and debates over the sustainable use of and trade in wildlife Bill Adams addresses the big questions and ideas that have driven conservation for the last 100 years How can the diversity of life be maintained as human demands on the Earth expand seemingly without limit How can preservation be reconciled with human rights and the development needs of the poor Is conservation something that can be imposed by a knowledgeable elite or is it something that should emerge naturally from people's free choices These have never been easy questions and they are as important in the 21st century as at any time in the past The author takes us on a lively historical journey in search of the answers *Against Extinction* William Adams, 2013 Conservation in the 21st century needs to be different and this book is a good indicator of why Bulletin of British Ecological Society Against Extinction tells the history of wildlife conservation from its roots in the 19th century through the foundation of the Society for the Preservation of the Wild Fauna of the Empire in London in 1903 to the huge and diverse international movement of the present day It vividly portrays conservation's legacy of big game hunting the battles for the establishment of national parks the global importance of species conservation and debates over the sustainable use of and trade in wildlife Bill Adams addresses the big questions and ideas that have driven conservation for the last 100 years How can the diversity of life be maintained as human demands on the Earth expand seemingly without limit How can preservation be reconciled with human rights and the development needs of the poor Is conservation something that can be imposed by a knowledgeable elite or is it something that should emerge naturally from people's free choices These have never been easy questions and they are as important in the 21st century as at any time in the past The author takes us on a lively historical journey in search of the answers **Against Extinction**, 2004 **At the End of Ridge Road** Joseph Bruchac, 2004 Asking readers to remove their watches so they might live time rather than be ruled by it Bruchac tells his own story one that sits at the crossroads of his Abenaki and European heritage From the foot of Glass Factory Mountain to the halls of Cornell from a classroom in West Africa to a start up literary magazine in a room of his grandfather's home Bruchac superimposes Native American ways of seeing upon the structure of today's world Bruchac believes the essential wisdom of native cultures the balance of nature and the power of a well told story each holds ways to avoid humanity's most destructive impulses BOOK JACKET **Nature Crime** Rosaleen Duffy, 2010-08-31 The perilous state of endangered species such as tigers and rhinos and the worldwide illegal trade in ivory diamonds bushmeat and many other rare and valuable commodities are familiar

issues in the West The heroes in these narratives are those who work to create protected areas for wildlife the villains the shadowy poachers and smugglers who destroy endangered animals and their habitats for the sake of profit In this groundbreaking book Rosaleen Duffy argues that the story is much more complex than this She analyses the workings of the black market wildlife industry pointing out that illegal trading is often the direct result of Western consumer desires from coltan for mobile phones to caviar for the global elite She looks at how tourists contribute often unwittingly to the destruction of natural environments Most strikingly she argues that the imperatives of Western style conservation often result in serious injustice to local people who are at risk of losing not only heir land but sometimes even their lives The result of many years of first hand research this book is essential reading for anyone who wants to understand the complex realities of nature conservation Jacket

Living with Lynx Jonny Hanson, 2025-03-06 This book investigates a vital and controversial question for conservation and rewilding in Britain and Ireland could and should we learn to live with lynx wolves and bears again We travel back in time around the world and into the future to explore this contested topic The author delves deep into the human psyche considering not only his own mixed feelings about large carnivore reintroductions but also why people have such polarised perspectives on top predators He brings his unique combination of expertise on snow leopards and their relationship with humans along with his experience as a farmer to illustrate the discussion Along the way we meet a cast of characters from across society including farmers rewilders and everyone in between It becomes clear that coexisting with large carnivores is
