Questions About Questions Judith M. Tanur, 1992-02-18 The social survey has become an essential tool in modern society providing crucial measurements of social change describing social life and guiding government policy But the validity of surveys is fragile and depends ultimately upon the accuracy of answers to survey questions As our dependence on surveys grows so too have questions about the accuracy of survey responses Authored by a group of experts in cognitive psychology linguistics and survey research Questions About Questions provides a broad review of the survey response problem Examining the cognitive and social processes that influence the answers to questions the book first takes up the problem of meaning and demonstrates that a respondent must share the survey researcher's intended meaning of a question if the response is to be revealing and informative The book then turns to an examination of memory It provides a framework for understanding the processes that can introduce errors into retrospective reports useful guidance on when those reports are more or less trustworthy and investigates techniques for the improvement of such reports Questions about the rigid standardization imposed on the survey interview receive a thorough airing as the authors show how traditional survey formats violate the usual norms of conversational behavior and potentially endanger the validity of the data collected Synthesizing the work of the Social Science Research Council's Committee on Cognition and Survey Research Questions About Questions emphasizes the reciprocal gains to be achieved when insights and techniques from the cognitive sciences and survey research are exchanged these chapters provide a good sense of the range of survey problems investigated by the cognitive movement the methods and ideas it draws upon and the results it has yielded *American Journal of Sociology*

Using Language Herbert H. Clark, 1996-05-16 Herbert Clark argues that language use is more than the sum of a speaker speaking and a listener listening It is the joint action that emerges when speakers and listeners writers and readers perform their individual actions in coordination as ensembles In contrast to work within the cognitive sciences which has seen language use as an individual process and to work within the social sciences which has seen it as a social process the author argues strongly that language use embodies both individual and social processes Arenas of Language Use Herbert H. Clark, 1992 When we think of the ways we use language we think of face to face conversations telephone conversations reading and writing and even talking to oneself These are arenas of language use theaters of action in which people do things with language But what exactly are they doing with language What are their goals and intentions By what processes do they achieve these goals In these twelve essays Herbert H. Clark and his colleagues discuss the collective nature of language the ways in which people coordinate with each other to determine the meaning of what they say According to Clark in order for one person to understand another there must be a common ground of knowledge between them He shows how people infer this common ground from their past conversations their immediate surroundings and their shared cultural background Clark also discusses the means by which speakers design their utterances for particular audiences and coordinate their use of

language with other participants in a language arena He argues that language use in conversation is a collaborative process where speaker and listener work together to establish that the listener understands the speaker's meaning Since people often use words to mean something quite different from the dictionary definitions of those words Clark offers a realistic perspective on how speakers and listeners coordinate on the meanings of words This collection presents outstanding examples of Clark's pioneering work on the pragmatics of language use and it will interest psychologists linguists computer scientists and philosophers
