Advanced Topics in Term Rewriting Enno Ohlebusch, 2002-04-12 Unlike current survey articles and textbooks here the so called confluence and termination hierarchies play a key role Throughout the relationships between the properties in the hierarchies are reviewed and it is shown that for every implication $X \Rightarrow Y$ in the hierarchies the property X is undecidable for all term rewriting systems satisfying Y Topics covered include the newest techniques for proving termination of rewrite systems a comprehensive chapter on conditional term rewriting systems a state of the art survey of modularity in term rewriting and a uniform framework for term and graph rewriting as well as the first result on conditional graph rewriting Advances in Logic Based Intelligent Systems Kazumi Nakamatsu, Jair Minoro Abe, 2005 LAPTEC 2005 promoted the discussion and interaction between researchers and practitioners focused on both theoretical and practical disciplines concerning logics applied to technology with diverse backgrounds including all kinds of intelligent systems having classical or non classical logics as underlying common matters *Processes, Terms and Cycles: Steps on the Road to Infinity* Aart Middeldorp, Vincent van Oostrom, Femke van Raamsdonk, Roel de Vrijer, 2005-12-11 This Festschrift is dedicated to Jan Willem Klop on the occasion of his 60th birthday The volume comprises a total of 23 scientific papers by close friends and colleagues written specifically for this book The papers are different in nature some report on new research others have the character of a survey and again others are mainly expository Every contribution has been thoroughly refereed at least twice In many cases the first round of referee reports led to significant revision of the original paper which was again reviewed The articles especially focus upon the lambda calculus term rewriting and process algebra the fields to which Jan Willem Klop has made fundamental contributions *Functional and Constraint Logic Programming* Herbert Kuchen, 2011-07-12 This book constitutes the refereed conference proceedings of the 20th International Workshop on Functional and Constraint Logic Programming WFLP 2011 held in Odense Denmark in July 2011 as Part of the 13th International Symposium on Principles and Practice of Declarative Programming PPDP 2011 the 22st International Symposium on Logic Based Program Synthesis and Transformation LOPSTR 2011 and the 4th International Workshop on Approaches and Applications of Inductive Programming AAIP 2011 From the 10 papers submitted 9 were accepted for presentation the proceeding The papers cover current research in all areas of functional and logic programming as well as the integration of constraint logic and object oriented programming and term rewriting **Advanced Topics in Artificial Intelligence** Rolf T. Gabbay, Jörg H. Siekmann, John Woods, 2014-12-09 Handbook of the History of Logic brings to the development of logic the best in modern techniques of historical and interpretative scholarship Computational logic was born in the twentieth century and evolved in close symbiosis with the advent of the first electronic computers and the growing

importance of computer science informatics and artificial intelligence With more than ten thousand people working in research and development of logic and logic related methods with several dozen international conferences and several times as many workshops addressing the growing richness and diversity of the field and with the foundational role and importance these methods now assume in mathematics computer science artificial intelligence cognitive science linguistics law and many engineering fields where logic related techniques are used inter alia to state and settle correctness issues the field has diversified in ways that even the pure logicians working in the early decades of the twentieth century could have hardly anticipated Logical calculi which capture an important aspect of human thought are now amenable to investigation with mathematical rigour and computational support and fertilized the early dreams of mechanised reasoning Calculemus The Dartmouth Conference in 1956 generally considered as the birthplace of artificial intelligence raised explicitly the hopes for the new possibilities that the advent of electronic computing machinery offered logical statements could now be executed on a machine with all the far reaching consequences that ultimately led to logic programming deduction systems for mathematics and engineering logical design and verification of computer software and hardware deductive databases and software synthesis as well as logical techniques for analysis in the field of mechanical engineering This volume covers some of the main subareas of computational logic and its applications Chapters by leading authorities in the field Provides a forum where philosophers and scientists interact Comprehensive reference source on the history of logic
