Science and Technology Vijay Kumar Jain, 2016-12-12 Finishing is the final operation after a part is sized and shaped
Currently in high tech industries there is a demand for nano level surface finishing of components This process is done to
improve the surface finish to remove the recast layer or to remove surface and sub surface defects The result is low friction
longer product life and low power requirements Equally important is the aesthetic aspect of the product This subject is
growing very fast from the technology as well as a science point of view Books on this subject are very limited particularly
