Advances In Cryogenic Engineering Volume 22:

Advances in Cryogenic Engineering K. D. Timmerhaus, 1973-07-01 The National Bureau of Standards Boulder Laboratories at Boulder Colorado once again served as the host for the 1972 Cryogenic Engineering Conference. For the Cryogenic Engineering Conference it was like coming home for it was at the NBS Boulder Laboratories that the Cryogenic Engineering Conference was first conceived and held in 1954 in connection with the dedication of the NBS Boulder Laboratories by President Dwight D. Eisenhower. The Cryogenic Engineering Conference is grateful for the continuing support that the National Bureau of Standards has given over the years and which was expanded on July 1, 1971 when the NBS Boulder Laboratories assumed the secretariat function of the Conference from the National Academy of Sciences. Because of common interests in heat transfer the 1972 Cryogenic Engineering Conference worked with the 13th National Heat Transfer Conference to develop a joint program in heat transfer. A majority of the papers presented in this cooperative effort are included in Volume 18 of the *Advances in Cryogenic Engineering* through the kind permission of the 13th National Heat Transfer Conference and are acknowledged accordingly. Advances in Cryogenic Engineering K. Timmerhaus, 1977-02-01 The First International Cryogenic Materials Conference (ICMC) provided a new forum for the presentation of low temperature materials research. The conference held in conjunction with the 1975 Cryogenic Engineering Conference provided materials research personnel with excellent exposure to current developments in the cryogenics field and beneficial interactions with designers of cryogenic systems. Because of the large response to a late call for papers the enthusiasm and encouragement at the meeting and the wide spectrum and high quality of papers the Second International Cryogenic Materials Conference is being planned along with the 1977 Cryogenic Engineering Conference for Boulder Colorado in the summer of 1977. The success of the First International Cryogenic Materials Conference was certainly in large measure due to the excellent hospitality of our Canadian hosts the Royal Military College of Canada and Queen's University in Kingston Ontario. In particular the efforts of A. C. Leonard and his staff ensured an excellent conference and a pleasant and memorable visit to Canada. The Cryogenic Engineering Conference Board was both generous and skillful in helping to initiate this new conference and their guidance and acceptance is gratefully acknowledged. The Cryogenic Engineering Conference program chairman M. J. Hiza greatly facilitated the interaction for the two conferences and provided valuable assistance in generating a workable program. The proceedings of the 1975 Cryogenic Engineering Conference are published as Volume 21 of the *Advances in Cryogenic Engineering* and include many papers indicating innovative use of new cryogenic materials properties data.
