*Advances in Ubiquitous User Modelling* Tsvi Kuflik, Shlomo Berkovsky, Francesca Carmagnola, Dominikus Heckmann, Antonio Krüger, 2009-10-13 Ubiquitous user modeling differs from generic user modeling by three additional concepts ongoing modeling ongoing sharing and ongoing exploitation Systems that share their user models will improve the coverage the level of detail and the reliability of the integrated user models and thus allow better functions of adaptation Ubiquitous user modeling implies new challenges of interchangeability scalability scrutability and privacy This volume presents results of a series of workshops on the topic of Ubiquitous User Modeling since 2003 and additional workshops at various other conferences e g on User Modeling and Adaptive Hypermedia in the last four years The 8 revised full papers presented were carefully reviewed and selected from the best lectures given at the workshops and were significantly extended to be included in the book

**User Modeling and Adaptation for Daily Routines** Estefanía Martín, Pablo A. Haya, Rosa M. Carro, 2013-02-15 User Modeling and Adaptation for Daily Routines is motivated by the need to bring attention to how people with special needs can benefit from adaptive methods and techniques in their everyday lives Assistive technologies adaptive systems and context aware applications are three well established research fields There is in fact a vast amount of literature that covers HCI related issues in each area separately However the contributions in the intersection of these areas have been less visible despite the fact that such synergies may have a great impact on improving daily living Presenting a comprehensive review of state of the art practices on user modeling and adaptation for people with special needs as well as some reflections on the challenges that need to be addressed in this direction topics covered within this volume include the analysis design implementation and evaluation of adaptive systems to assist users with special needs to take decisions and fulfil daily routine activities Particular emphasis is paid to major trends in user modeling ubiquitous adaptive support diagnostic and accessibility recommender systems social interaction designing and building adaptive assistants for daily routines field studies and automated evaluation Nine leading contributors write on key current research in the domain of adaptive applications for people with special needs integrating and summarizing findings from the best known international research groups in these areas User Modeling and Adaptation for Daily Routines highlights how adaptation technologies can ease daily living for all and support sustainable high quality healthcare demographic ageing and social economic inclusion highlights how adaptation technologies can ease daily living for all and support sustainable high quality healthcare demographic ageing and social economic inclusion
