Advances In Neural Information Processing Systems 9:

Advances in Neural Information Processing Systems 12 Sara A. Solla, Klaus-Robert Müller, Todd K. Leen, 2000 The annual conference on Neural Information Processing Systems NIPS is the flagship conference on neural computation. It draws preeminent academic researchers from around the world and is widely considered to be a showcase conference for new developments in network algorithms and architectures. The broad range of interdisciplinary research areas represented includes computer science, neuroscience, statistics, physics, cognitive science, and many branches of engineering, including signal processing and control theory. Only about 30 percent of the papers submitted are accepted for presentation at NIPS, so the quality is exceptionally high. These proceedings contain all of the papers that were presented.

Advances in Neural Information Processing Systems 19 Bernhard Schölkopf, John C. Platt, Thomas Hofmann, 2007 The annual Neural Information Processing Systems NIPS conference is the flagship meeting on neural computation and machine learning. This volume contains the papers presented at the December 2006 meeting held in Vancouver.

Deterministic and Statistical Methods in Machine Learning Joab Winkler, Neil Lawrence, Mahesan Niranjan, 2005-10-11 This book constitutes the refereed proceedings of the First International Workshop on Machine Learning held in Sheffield, UK in September 2004. The 19 revised full papers presented were carefully reviewed and selected for inclusion in the book. They address all current issues in the rapidly maturing field of machine learning that aims to provide practical methods for data discovery, categorisation and modelling. The particular focus of the workshop was advanced research methods in machine learning and statistical signal processing.

ECAI 2023 Kobi Gal, Ann Nowé, Grzegorz J. Nalepa, Roy Fairstein, Roxana Radulescu, 2023-10-15 Artificial intelligence or AI now affects the day to day life of almost everyone on the planet and continues to be a perennial hot topic in the news. This book presents the proceedings of ECAI 2023, the 26th European Conference on Artificial Intelligence and of PAIS 2023, the 12th Conference on Prestigious Applications of Intelligent Systems, held from 30 September to 4 October 2023 and on 3 October 2023 respectively in Kraków, Poland. Since 1974, ECAI has been the premier venue for presenting AI research in Europe and this annual conference has become the place for researchers and practitioners of AI to discuss the latest trends and challenges in all subfields of AI and to demonstrate innovative applications and uses of advanced AI technology. ECAI 2023 received 1896 submissions, a record number of which 1691 were retained for review, ultimately resulting in an acceptance rate of 23%. The 390 papers included here cover topics including machine learning, natural language processing, multi agent systems and vision, and knowledge representation and reasoning. PAIS 2023 received 17 submissions, of which 10 were accepted after a rigorous review process. Those 10 papers cover topics ranging from fostering better working environments, behavior modeling, and citizen science to large language models and neuro-symbolic applications, and are also included here. Presenting a comprehensive overview of current research and developments in AI, the book will be of interest to all those working in the field.

Genevieve Orr,Klaus-Robert Müller,1998 It is our belief that researchers and practitioners acquire through experience and word of mouth techniques and heuristics that help them successfully apply neural networks to difficult real world problems Often these tricks are theoretically well motivated Sometimes they are the result of trial and error However their most common link is that they are usually hidden in people's heads or in the back pages of space constrained conference papers As a result newcomers to the field waste much time wondering why their networks train so slowly and perform so poorly This book is an outgrowth of a 1996 NIPS workshop called Tricks of the Trade whose goal was to begin the process of gathering and documenting these tricks The interest that the workshop generated motivated us to expand our collection and compile it into this book Although we have no doubt that there are many tricks we have missed we hope that what we have included will prove to be useful particularly to those who are relatively new to the field Each chapter contains one or more tricks presented by a given author or authors We have attempted to group related chapters into sections though we recognize that the different sections are far from disjoint Some of the chapters e.g 1 13 17 contain entire systems of tricks that are far more general than the category they have been placed in
