and John Villadsen originally published in 1994 by Plenum Press now part of Kluwer Time runs fast in Biotechnology and

when Kluwer Plenum stopped reprinting the first edition and asked us to make a second revised edition we happily accepted

A text on bioreactions written in the early 1990 s will not reflect the enormous development of experimental as well as

theoretical aspects of cellular reactions during the past decade In the preface to the first edition we admitted to be

newcomers in the field One of us JV has had 10 more years of job training in biotechnology and the younger author IN has

now received international recognition for his work with the hottest topics of modern biotechnology Furthermore we are

happy to have induced Gunnar Liden professor of chemical reaction engineering at our sister university in Lund Sweden to

join us as co author of the second edition His contribution especially on the chemical engineering aspects of real bioreactors

has been of the greatest value Chapter 8 of the present edition is largely unchanged from the first edition We wish to thank

professor Martin Hjortso from LSU for his substantial help with this chapter
