Biosocial Model:

Understanding and Treating Adolescent Substance Abuse Philip P. Muisener, 1994 Biological psychological and social factors are considered in this volume in its exploration of adolescent substance abuse with adolescents presented as a clearly defined group with unique needs and concerns The author examines issues such as assessment treatment planning service provision and the recovery process and proposes creative treatment approaches Integrating the complex elements which impact upon the initiation maintenance and treatment of young substance abusers the author uses his biopsychosocial model to examine normative issues for adolescents and how impairment in these areas can cause or be the result of substance abuse Consideration is also given to particularly vulnerable young people such as *Criminology* Stephen E. Brown, Finn-Aage Esbensen, Gilbert Geis, 2015-07-03 *Criminology Explaining Crime and Its Context* Ninth Edition is a highly acclaimed textbook offering a broad perspective on criminological theory It provides students of criminology and sociology with a thorough exposure to a range of theories contrasting their logic and assumptions but also highlighting efforts to integrate and blend these frameworks In this ninth edition the authors have incorporated new directions that have gained traction in the field while remaining faithful to their criminological heritage Among the themes in this work are the relativity of crime its changing definition with abundant examples historical roots of criminology and the lessons they have provided and the strength and challenges of applying the scientific method This revision offers enhanced coverage of biosocial theories of crime more global examples and a new chapter on youth violence improving on the most comprehensive and balanced theory text available for undergraduates [Vulnerability to Psychopathology \(1st Ed.\)](#) Marvin Zuckerman, 1999

Sustainable Ecological Systems W. Wallace Covington, Leonard F. DeBano, 1994 This conference brought together scientists and managers from federal state and local agencies along with private sector interests to examine key concepts involving sustainable ecological systems and ways in which to apply these concepts to ecosystem management Session topics were ecological consequences of land and water use changes biology of rare and declining species and habitats conservation biology and restoration ecology developing and applying ecological theory to management of ecological systems and forest health and sustainable ecosystems to respond to human needs A plenary session established the philosophical and historical contexts for ecosystem management Title page verso [Women in Psychiatry 2023: Autism](#) Rita Barone , Costanza Colombi, 2025-04-11 This Research Topic is the next volume in the series see the previous volume here At present fewer than 30% of researchers worldwide are women Long standing biases and gender stereotypes are discouraging girls and women away from science related fields and STEM research in particular Science and gender equality are however essential to ensure sustainable development as highlighted by UNESCO In order to change traditional mindsets gender equality must be promoted stereotypes defeated and girls and women should be encouraged to pursue STEM careers Therefore *Frontiers in Psychiatry* is proud to offer this platform to promote the work of women scientists across all fields of Psychiatry The work
